GENERAL INVESTIGATIVE DIVISION

This concerns the attempted assault on Vice President Agnew during demonstration, Columbus, Ohio, 5-9-72, where he was attending a fund-raising dinner for the Republican Party. A rock was thrown at the vehicle carrying the Vice President which cracked the window behind his head; no injuries sustained.

Attached relates results of investigation to identify assailant. A brick weighing about five pounds located in area where incident occurred recovered which may be missile and brick being forwarded to FBI Laboratory.

Pictures obtained by Columbus, Ohio, news media being obtained for review to determine if any photograph would identify assailant.

Most demonstrators refused to talk to Bureau Agents, being extremely belligerent and antagonistic.

FBI sources among demonstrators believed attempted assault was spontaneous and not part of planned demonstration.

Vigorous investigation continuing to identify unknown subject.

SUBJECT: UNKNOWN SUBJECT; ATTEMPT TO ASSAULT VICE-PRESIDENT SPIRO AGNEW DURING DEMONSTRATION, COLUMBUS, OHIO, MAY 9, 1972; ASSAULT OF VICE-PRESIDENT OF UNITED STATES; DESTRUCTION OF GOVERNMENT PROPERTY

During the appearance of Vice-President Agnew in Columbus, Ohio, on 5/9/72, demonstrators gathered near his vehicle and apparently someone threw a missile at the limousine causing a fracture in the rear window. An FBI investigation was immediately initiated under the Presidential Assassination Statute and the Cincinnati Office requested that the broken window be examined by the FBI Laboratory.

The Bureau was subsequently advised that the limousine had been flown to Japan for use by the Vice-President in his appearance there. Arrangements were made through SA [redacted] U. S. Secret Service liaison, to advise the Bureau when the limousine had been returned to Washington, D. C.

Yesterday afternoon the Bureau was advised that the limousine was available for examination at the U. S. Secret Service garage at 1310 L Street, N.W. SA Richard W. Flach of the Physics and Chemistry Section conducted a preliminary examination of the break in the window and photographs were taken. It is the intent of the Secret Service to replace this window and arrangements were made to make the window available to the Laboratory for detailed examination following its removal.

Result of examination:

The impact on Q2 appears to have come downward at a slight angle from the vertical on the slanted window and from a direction behind the left rear side of the automobile.

The crushed glass and cone of the impact area are characteristic of a low velocity object. No metal smears, no brick particles, no concrete particles or other materials were found which would indicate or identify the object impacting the glass. Dust particles and black specks from the coating on the tape on the glass were all that were found at the impact area.

An examination was made of the area on and adjacent to 20th Avenue, north of Lausche Building, Ohio Expositions Grounds, which located a half paving brick in the grass area at the south edge of 20th Avenue between Gate 1 and Gate 14 at a spot opposite junction of 20th Avenue and a gravel street that dead ends into 20th Avenue from the north. The half brick was 9 feet, 3 inches from the pavement of 20th Avenue, 7 feet, 7 inches from a fence at the north end of the Lausche Building, and 4 feet, 2 inches east of a large brace post that slants to a large utility pole planted south of the above fence.

Grass beneath the half brick was alive and had just begun to wilt, indicating that this item had not been in this position for a very long period of time.

The half brick was photographed in position as discovered, then placed in a cellophane envelope and removed as possible evidence.

All of the above activity was observed by
 Special Agent, Secret Service, U.S. Treasury Department, Columbus, Ohio.

A 1971 Cadillac Fleetwood sedan was examined at Columbus Fire Department Fire Station #3, Fourth and Fulton Streets. The vehicle was identified by Special Agent [redacted], Vice President Protection Division, United States Secret Service, as Vehicle # SS 232 X.

Agent [redacted] advised the above vehicle is the one in which Vice President SPIRO AGNEW was a passenger on the evening of May 9, 1972, when an unknown missile, projected by an unknown subject, struck the upper right portion of the rear window, causing a fracture of the glass contained therein. Agent [redacted] advised that the damaged portion of the glass was temporarily covered with black plastic electrical tape to make it less conspicuous.

b6
b7C

The black tape was removed and photographs were taken with a Bessler Topcon Camera, #4617332, using 35 mm Kodak Plus-X Pan film (PX 135-36) under available light conditions.

The black tape, when removed to expose the damaged area of the window, was noted to retain a fragment of glass and a small amount of powdered substance from the fractured area. The tape, with fragments adhering to its surface, was obtained and retained.
