On about the 15 th Several of us talked with Mr. Dinnally, the Commissioner of Lands. He said that he was prepared to finalize the lease as soon as the survey was completed and handed in. He said that he was not in a position to keep the Provisional Lease in effect, and felt that it would not be in our best interest to do so because of the rental expense that we would assume as a result thereof. He showed us the file with the Ministers notes in it saying that the remaining area should be held in reserve for us. He said that we would like written confirmation because our plan covers the entire area etc. He replied that that would be a political decision, and suggested that we write to him a formal letter request. The attached letter followed in consequence.

Talked to B. Matthews Thursday. He said that the physical survey has been campleted, and drafting work only remains to be cone. He had to go to P.K. to get the field notes (he did not do the work himself, an employee did it) and bring them back to town to complete the mathematics and do the map. He said that they would be ready to hand in at the end of the month. Mr. Dirally had said that the lease wouldtake just a few days to issue once the survey is in.

Our idea, if we get written comfirmation, is to have B. Matthews complete the work on the big survey, which consists of the math and map making - \$2000 under our original contract, and to file it with the Commissioner of Lands. This is so that there should be no question about the boundaries of the area that will be held in reserve for us. It this all works out we should have the balance reserved without the rent obligation.

This wolar or arrangement will not give us logging rights over the whole area of the Provisional Leage. To get these rights it would be necessary to make application to the Consurvator of Porests in the Porestry Dep. I do not forsee a problem as the Govt. is encouraging the simber industry in every way it can.

MAILED TO U.S.A.

C-4-a-5

21st April, 1975

Mr. Ronald Dinally, Commissioner of Lands, Ministry of Agriculture, Lands Department, Brickdam, Georgetown.

Re: Lease Application No. 1/2/3843

Lear Sir:

On 10th April, 197h we were issued a Provisional Lesse for twenty-five thousand (25,000) acres. Therefore, the entire area was surveyed. In our recent meeting with the Honourable Minister of Agriculture, Mr. Gavin Kennard, and yourself, it was determined that a permanent lease for a portion of the land held under the said provisional lease would be presently issued, and the remainder of said lands be held for our future expansion.

It is our intention to occupy and develop the entire area covered by the said provisional lease. It is our firm conviction that the entire area will be best developed by one coordinated development plan and our project is designed with that plan.

To date our rate of development has been considerably less than our capability. Kembers of the Board of Erustees have been unwilling to commit our maximum resource until the legal aspects of the program (i.g. corporation, lease, etc.) were completed.

Accordingly, we are requesting written confirmation that the balance of lands included under said provisional lease will be reserved for us, and leases for parts thereof be issued therefore seriatim as each leased area is substantially developed.

Yours faithfully,

Eugene Chaikin

GENERAL SUMMARY

This project plan is intended to modify and supplement the plan heretofore submitted. It covers the first ten year program proposed by applicant for the development of the 25,000 (more or less) acres described in the map on file. All areas situate at 60 foot contour and below will not be used due to risk of flooding. All lands having a gradient of 15 degrees or more will not be used due to erosion problems. These areas will be left as "greenbelts," as will lands for 150 feet on either side of streams. By this means it is hoped that climate, surface water and other ecological factors will not be adversely affected by extensive land clearing. Thus it is estimated that only 50% of the total land will be used for agriculture, the remainder retaining its natural state.

Site development has begun with the construction of a road along the east-west ridge which forms the backbone of the leasehold. This same ridge forms the divide for watershed between the Barima and Kaituma rivers. The road extends for three miles into the center of the proposed lease area. One half mile off of the ridge, an irregularily shaped 60 acre area is being developed as a town site. Here will be constructed housing, a large all purpose community building (dining, church, meeting, recreation, etc.), administrative offices, laundry, cold storage, infirmary (cottage hospital), barns, repair sheds, dairy, pig and poultry houses, wood and metal shops, water and fuel storage facilities, an electrical generating plant, and sewage treating and disposal plant.

Agriculture and livestock development began last Autumn with the clearing of approximately 110 acres. The Fall was very wet so that we did not obtain a good burn, but we did plant over 60 acres. Most of the planting materials needed for future production are now growing on the farm. At the conclusion of the Spring planting season over 180 acres will be planted, including 60 acres designated for pasture. The basic agriculture development will be expanded at the rate of 300 acres per year, weather and labor supply permitting.

Pig rearing will begin in the Spring of 1975 with two boars and 20 brood sows. The plan is to expand the total population to 300 animals in 18 to 20 months. This would permit an ongoing monthly production of 5,500 lb. live weight. All animal feeds will be raised on the farm, and only vitamin and medicinal supplements will be imported.

The dairy herd will be introduced in the summer or early fall of 1975 as soon as pasture is sufficiently developed to accommodate the animals. We will use legumes, sugar cane, corn and provisions as food supplements. Our present plan is to acquire local dairy cattle and to upgrade the herd by selective breeding techniques, though we do intend to expand the initial herd to 50 cows by purchase. From the fresh milk produced by the cows, dried milk and butter will be produced. Later, a beef cattle herd will be developed from the culls of the dairy cattle, and bred toward a beef line.

Land clearing has commenced as indicated above. As much acerage will be cleared as weather and utilization permit. Our benchmark is 300 acres per year. Hand labor is being used to clear, and only areas to be ultimately devoted to tree or row crops are subsequently winrowed by bull-dozer. We hope to utilize techniques which will reduce the use of machinery to a minimum.

We will strive to fell and burn a maximum amount of land, but will defer the stumping and winrowing processes. We will use the newly burned land for catch crops, then for pasture over several years until much of the remaining wood has rotted.

STAGED DEVELOPMENT SCHEDULE

Preliminary - January 1, 1974 to August 1, 1974. In this period the following events took place: site location, preliminary planning, leasehold application, commencement of incorporation procedure, arrangement for housing for the first workers group, procuring initial equipment, initial clearing, survey and road building.

Phase One - August 1, 1974 to March 1, 1976. Toward the beginning of this period the work force will be brought up to about thirty persons to be increased gradually thereafter according to our capability of absorbing them into the project, and the work load. All of the basic machinery and equipment will be brought in. (See schedule of machinery and equipment.) Of the facilities described in the Summary, all will be constructed except for 40% of the housing. Agriculture will be carried out as indicated in the land clearing and utilization charts. Much of the clearing and planting at this stage will be done with contract labor.

Phase Two - March 1, 1976 to September 1, 1977. The remaining housing will be built and over this period of 18 months additional people will come. Many of these will be the wives and children of the workers who came previously. Some will be professional and semi-professional persons such as nurses and school teachers, as well as persons skilled in agriculture. Additional lands will be cleared and utilized as set out in the charts. A reservoir will be built as shown on the map and an irrigation system developed. During this period the food processing plants will be completed, including: butter and dried milk plants; small cassava starch and cassareep manufacturing plant; and animal food production plant.

Phase Three and Subsequent - September-1977 and thereafter.

The basic farm plan will be expanded in those areas which have proved successful. Land will be cleared as fast as weather, available labor, and utilization will permit. The basic population of the town will be expanded primarily by the inclusion of those Guyanese persons who choose to join the community and are willing to participate with respect to its goals, lifestyle, and economic structure. Social and educational programs will be developed and integrated with those of the local community, including a school and sports center. We hope to build a small hospital or a nice size clinic and will do so unless there are economic limitations.

FARM ORGANIZATIONAL STRUCTURE

The farm will be operated by a five person committee which will serve as the executive head of the farm operation. The members will be as follows:

CHAIRMAN, Eugene Chaikin, Irustee of the Church, Member of the Project Head Committee of Peoples Temple Agricultural Mission in Guyana, Member of the Board of Trustees of Peoples Temple Christian Church. Mr. Chaikin has 5 years Supervisory Administrative Experience, and is admitted to the Bar in Federal Courts and Courts of the State of California, in the U.S.A.

FARM MANAGER, Mr. Ray Jones. Mr. Jones has 20 years of farming experience in the Mid West, U.S.A. primarily in row crops such as corn, soya beans, etc.

MEMBER, Mr. Jim Bogue. Mr. Bogue has eighteen years experience in the cattle industry both in beef production and in the dairy industry. For eight years he was the general manager of a large dairy herd.

MEMBER. Mr. Tom Grubbs. Mr. Grubbs has 15 years experience in Agriculture, primarily in orchard crops. He has had several years of experience in nursery management with speciality in orange and other citrus.

MEMBER, Mr. Russel Mouton. Mr. Mouton has a college degree in agriculture, with a speciality in Agricultural Economics. He is now taking specialized courses in Tropical Agriculture.

 $\underline{\text{EX OFICIO}}$ MEMBER We would like to include as an ex oficio member the local Agricultural Officer, to whom we will look for invaluable local experience.

The day to day operation of the farm will be under the control of the Farm Manager. Each of the principal sectors will be supervised by an Assistant Farm Manager for that sector. They will include:

Assistant Manager for Animal Production, Mr. Jim Bogue, who will be responsible for meat and dairy animals and poultry; Assistant Manager for Orchard Crops, Tom Grubbs, who will be responsible for orchard crops; Assistant Manager for Row and Garden Crops, initially Mr. Ray Jones, who will be responsible for row crops, vegetable gardening and all "home consumption" agriculture. Each Assistant Manager will have such personel assigned to him as he may require. Some of the personel will be church members and some will be local Guyanese who will be employed by the church.

Farm economics and long term planning will be handled primarily by Mr. Mouton with help from other members of the committee, and in laison with the Manager of the Distribution Section.

FINANCIAL PROJECTION THROUGH PHASE ONE

(January 1974, Through February 1976)

The sum of \$1,900,000 (calculated at U.S. \$1 - G.\$2.20) has been spent or is budgeted to be spent on the project through the first phase. Unspent funds are now held in liquid form in U.S. and Canadian Banks. These expenditures will be made, roughly, as follows:

Dear Doctor Reid:

We are well pleased with the cordial reception we have recieved in Guyan a. Past or Jones, upon h is return to th U.S. has had fine thing s to say abou t this country and its Government . Last weeken d these comments were recieved by the Mayor of the largest cit in California, who attended our services.

There are two noin ts which relate to our program in Guyana_ which we feel need your help. The first is simply speed in admin istrative handling. Due to inflation we need to order equipment at the first available momen to You are undoubtedly acutely aware of the current impact of inflation upon our buyin g power. accentance Exxemplas we will immediately beginn implementation

of our plan .

The second point relates to the proceedure for obtaining permanent residence visas. Regulations require a police report from the area of residence. We have the best of relations with local police, however, as Pastor Jon es may have told you, we wish to make this transition with as little publicity as possible. This is because our economic base inth e U!S! would be sub stantially impaired if our intended move were to be publicized. Further, a few unscrupulous newspaper reporters wight use the information to injure our ministry. Should requests for reports be sent covering several hundred persons, as our plan indicates, the information in the hands of clerks and netty officials would surely leak out. We therefore wish to have this provision waived, and substitute therefore the personal endorsement of Mr. Timothy Stoen, Assiatant District Attorney, Mendocino County, California, or other suitable endorsement. We feel that the maintenance of the confiden tiality of our moove is essential, and it is for this reason that this request is made.

Of course the U!s. government is fully informed concerning our activities. We descrabed our planned agricultural mission to the Consulate and they were warmly receptive. They requested that we keep them informed of our progress, and we shall do so.

Th ank you for your help and your symmathetic consideration of these matters. We regret having to write, and thus taking your yaluable time. An attempt was made to meet with you but we did have we would be pleased. Should you have my question about these matters we would be pleased to meet with you have my question about these matters we would be pleased to meet with you at any time.

PEOPLES TEMPLE ROUGH PLAN CONTINUED.....

ANIMALS

Chickens:

Starting with a population of 100 we intend to built up to a population of 2,000 mixed layers and fryers. This is intended as primarily a home consumption industry and will not be expanded into a commercial enterprise unless a market is readily evident and adequate transport is available.

Pigs:

Starting with a population of boars and 20 sows total population of 300 animals will be reached in about 15 months. The population will be stabilized at that level for the forse-able future. This will enable us to ship about 30 animals per month, or 6,000 lbs., live weight.

Cattle:

We contemplate raising both dairy and beef cattle. The dairy will be started first, probably with 35 animals in the fall of 1975, the population to be built up primarily as we when we have developed sufficient power and refrigeration to handle substantial amounts of dairy products. This should be completed beyond the scope of this plan.

Notes on Certain Crops:

Corn, some blackeye peas (low grade), sweet cassava, some pigeon pea (low grade), sweet potatoes (rejects), banana and plantain (rejects) will be used in the manufacture of animals feed, as well as the sugar cane.

Miscellaneous:

In addition to the enumerated crops we will be planting a large home consumption garden and test plots of a variety of plants such as soya bean, ginger, tumeric, tomato, sorghum, and others which are not specifically mentioned becoase they have no commercial importance at this time but may be planted in the future in commercial quantities when tests prove that they are both biologically and economically viable.

100 Fourth Avenue, Subryanville, Georgeteiz.

16th November, 1974.

The Commissioner, Lands Department, 39 Bricklan, Georgetown.

Dear Sir,

I beg to bring to your attention that under Contract dated the 21st February, 1974 I have been retained by The Peoples Temple of the Disciples of Christ to Survey and Demarcate the area of State Land held by them under State Land Lease DL 1/2/3843 and situated on the right bank Kaituma river; this Lease falls on State Land and as such I would be most happy if you may great the necessary permission, under the State Lands Ordinance, for me to execute the Survey and Demarcation.

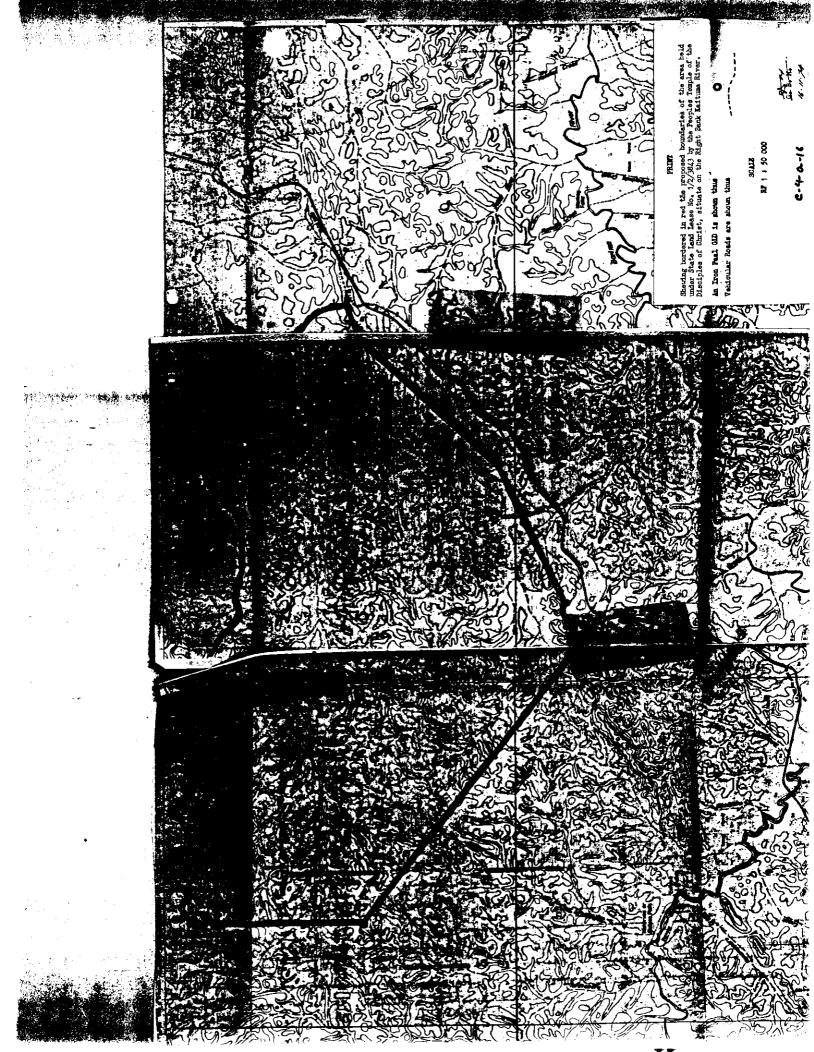

Attached for your information is a print showing the proposed boundaries of the area to be surveyed; it is intended to use the information from the 1:10 000 Topographic Sheets produced by Terra Surveys (Plan No. 15013) and the 1:50 000 Topographic Sheets 4 SE and 5 St to plot the courses of the Kaituma River and Aratabaka Creek; it is also proposed to plot the completed Original and Duplicate plans to a scale of 1:25 000 while the area would be obtained by planimetric methods.

Hoping for your co-operation in the foregoing.

Yours co-operatively,

G. Bernard Matthews . Sworn Land Surveyor.

I Preamble:

We wish to extend our appreciation to all branches and personnel of the Government, and to the Co-operative Republic of Guyana for the opportunity to present this plan; and for their generous cooperation, as istance and hospitality without which its development could not have been possible.

It is our desire and intention to work with the development toward the fruition of the FCH Program and the development of the Kaituma area. We are fully aware that if will bully be through our joint effort and cooperation that this plan will succeed.

II Proposed description of land to be taken up:

A tract of approximately twenty thousand (20,000) acres bounded on the south by the Port Kaituma-Matthews Ridge Railway, on the east by existing surveyed lands, on the north by the Kaituma River and on the west by a line to be determined. The property is sufficient on a map which is attached to this plan, and marked schedule One.

III Form of taking and holding land: ,

The land is to be taken and held in an agricultural, lease. The People's Temple Church shall be registered in Guyana and shall be the lessee. This form of holding is preferable because the church corporation is the depository

of the collective assets of the congression, and because the laws of the state of California, and the Carled States of America restrict the use of funds for individual purposes.

A copy of a suggested leave form is attached for reference and marked Schedule Two.

IV Land use:

The ultimate use of any specific breakfill, of course, depend upon contour, elevation, soil type and are resize, to that specific details of use must await clearing and soil testing. We will, of course, be heavily guided by advice from the Ministry of Agriculture. Centary prefimingury subdelines, however, are established. For the suspose of implementing guidelines we have divided the land into the fullowing categories:

A. Green areas: To preserve related 1 and soil moisture large sections must be left as green areas in autombed condition. These will be the ridge areas, materished of year-round streams, and areas of stoop contour, and will aggregate rounds themselves are occurred in the tract.

- C. Water storages one or more natural basins should be damned up to provide for water storage in case of drought, for fish farms and recreational activities. Description of locations which will be suitable must await reological investigation.
- D. Livestock: By for the greatest portion tratic of 4:11 of useable land will be devoted to the raising of cattle on planted and tenced pasture lands. Preliminary information gathered at Natthews Ridge indicate ratios of one cow per acre or action are obtainable. Thus are to assume an initial hard of two bundred to two broaded and tifty animals within the first two years, depending on the availability of good cattle for purchase, and to expand the herd as fast as natural reproduction and available pasture full permit. Maising at goals for meat and milk will also begin when a suifable broad can be obtained. Commercial positive and the farming will be instituted as storage and transportation facilities become available.
- E. Agriculture. The remainder of the area will be of allocated to tree crops feitens and secondo pessi, etc.

 and to mechanised monads. The crops to be stoom are those specified by the Department of National Pecelopment and Spriculture for the area. Also, an it error will be made to grow only and onrows, and a variety of green vegetables for the Georgetaan market. Additionally an effort will be made to mechanize the cultivation of ground provisions. Treditional tropical crops of banana,

Minitain and caseava will also be planted. Emphasis, however, will be placed on high protest crops such as peanut and legimes. Extensive soil development programs will be implemented.

V Land clearing:

method of land clearing, the progress will naturally depend upon our ability to utilize the cleared land at once, the weather, land contours, and other factors. It is one intention to keep twenty to thirty persons occupied with clearing, and two caterpillar defect tractors equipped with KG blades, as weather permits. A minimum of five hundred excess should be cleared and out into production per year, and we home to do far more.

Peoples temple is a collective. We are able to undertake this project, not because we are sponsored by a wealthy person or corporation, but because many people have combined their strength and economic resources to put them collectively at the service of humanity. It is a tribute to our Pastor Jim Jones that the organization exists to make this possible.

The intend to live in centrally located multiple unit housing. We will attend public schools. We will have teachers available to supplement the Port kailuma Mair, should the Department of Education desire, and trained paramedical personnel.

available to work in the area as needed. Full pacticipation in this plan will be open, and encouraged, to any Suvanese person no wishes to participate in the group litesty of and discipline. We hope that the community will develop in such a manner that we can teach, and learn from Guyanese agriculturalist We fully intend to participate in the activities of the larger Port Kaituma-Mattnews Ridge area.

IX Conclusion:

This plan represents the thinking of the Peoples Temple
Team in Suyana, based upon information currently available.
We would appreciate suggestions as to how it may be improved
or corrected. Peoples Temple is committing its strength,
in human resources and finances to this project. We come
to stay and succeed. We feel that our project is a Suyanese
project. Our dream is the Suyanese dream, to become effective
as cooperative man.

The Commissioner, Lands Department, 39 Brickdam, Georgetown.

Dear Sir.

Attached for further action by you are the following:-

- a. An application for a State Land Lease, together with a map, over a tract of 25,000 acres of State Land situate in the North West District.
- b. A photocopy of the Articles of Incorporation of The Peoples Temple of the Disciples of Christ, State of California, United States of America.
- e. A photocopy of Resolution He. 73 5 authorizing the establishing of a Branch Church and Agricultural Mission in the Co-operative Republic of Guyana.
- d. A photocopy of the Agricultural Development Plan for a Twenty Thousand Acre Site in the Port Kaituma Area by The Peoples Temple Agricultural Mission.
- and e. A Specimen Lease Form.

Item b. above has been submitted for your perusal and eventual return; all other documents are for your records.

- This application has been discussed with the appropriate Technical Staff of the Ministry of Mational Development and Agriculture and with the Hon. Dr. Ptolemy Reid and the Hon. Regional Minister Fitz Carmichael; we have also visited and inspected the area applied for accompanied by the Hon. Carmichael and Mr. C. B. Matthews, the Sworn Land Surveyor presently executing the cadastral surveys for the Government of the adjacent areas.
- As can be seen from the attached Specimen Lease form we have suggested certain changes and additions; it should be noted that we would be engaging in mixed farming, both crops and cattle; as such we have calculated the rent payable on the ratio of occupancy which each type of farming would be engaged in. As such over a total acreage of 25,000 acres it is assumed that nearly 10,000 acres would not bd used either because of flood conditions, unsuitable terrain or because of the necessity to provide green areas; the remaining 15,000 acres is set up on a basis of a four (for cattle) to one (for crops) ratio. This would therefore mean 12,000 acres at 10s per acre (\$1200.00) and 3,000 acres at 25s (\$750.00) for a total rent of \$1950.00

per year for the first five years. The second Five Year Period would then cost \$3900.00 per year while the Third Five Year Period would cost \$7800.00 per year.

In compliance with the Laws of the Co-operative Republic of Guyana we have made the necessary arrangements to have our Body duly incorporated (in Guyana) by an of of Parliament; in the mean while we would hope that urgent action could be taken to have our application finalised so that work could commence as soon as possible on the area chosen.

Thanking you for your kind so-operation in the foregoing.

Yours co-speratively,

Pro Forma Lease	marked	Schedule	Pages

I Preamble:

We wish to extend our appreciation to all branches and personnel of the Government, and to the Co-operative Republic of Guyana for the opportunity to present this plan; and for their generous cooperation, assistance and hospitality without which its development could not have been possible.

It is our desire and intention to work with the Government toward the fruition of the FCH Program and the development of the Kaituma area. We are fully aware that it will only be through our joint effort and cooperation that this plan will succeed.

II Proposed description of land to be taken up:

A tract of approximately twenty thousand (20,000) acres bounded on the south by the Port Kaituma-Matthews Ridge Railway, on the east by existing surveyed lands, on the north by the Kaituma River and on the west by a line to be determined. The property is outlined on a map which is attached to this plan, and marked Schedule One.

III Form of taking and holding land:

The land is to be taken and held in an agricultural lease. The Peoples Temple Church shall be registered in Guyana and shall be the lessee. This form of holding is preferable because the church corporation is the depository

of the collective assets of the congregation, and because the laws of the State of California, and the United States of America restrict the use of funds for individual nurposes.

A copy of a suggested lease form is attached for reference and marked Schedule Two.

IV Land use:

The ultimate use of any specific area will, of course, depend upon centour, elevation, soil type and area size, so that specific details of use must await clearing and soil testing. We will, of course, be heavily guided by advice from the Ministry of Agriculture. Certain preliminary guidelines, however, are established. For the purpose of implementing guidelines we have divided the land into the following categories:

- A. Green areas: To preserve rainfall and soil moisture large sections must be left as green areas in untouched condition. These will be the ridge areas, watershed of year-round streams, and areas of steen contour, and will aggregate roughly twenty-five percent or more of the tract.
- B. Flooded areas: Certain areas will be too subject to flooding to make their use practical under present conditions. These are defined as areas below the sixts foot contour line. Flooded areas may be developed at a later time, when large drainage and water control projects become feasible. We estimate flooded areas to cover about twenty percent of the tract.

- C. Water storage: One or more natural basins should be damned up to provide for water storage in case of drought, for fish farms and recreational activities. Specification of locations which will be suitable must await geological investigation.
- D. Livestock: By far the greatest portion (ratio of 4:1) of useable land will be devoted to the raising of cattle on planted and fenced pasture lands. Preliminary information gathered at Matthews Ridge indicate ratios of one cow per acre or better are obtainable. Plans are to acquire an initial herd of two hundred to two hundred and fifty animals within the first two years, depending on the availability of good cattle for purchase, and to expand the herd as fast as natural reproduction and available pasture will permit. Raising of goats for meat and milk will also begin when a suitable breed can be obtained. Commercial poultry and fish farming will be instituted as storage and transportation facilities become available.
- E. Agriculture: The remainder of the area will be allocated to tree crops (citrus and avocado pear), etc, and to mechanized annuals. The crops to be grown are those specified by the Department of National Sevelopment and Agriculture for the area. Also, an attempt will be made to grow garlic and onions, and a variety of green vegetables for the Georgetown market. Additionally an effort will be made to mechanize the cultivation of ground provisions. Traditional tropical crops of banana.

plantain and cassava will also be planted. Imphasis, however, will be placed on high protein crops such as peanut and legumes. Extensive soil development programs will be implemented.

V Land clearing:

There is obviously much debate as to the most effective method of land clearing. Our progress will naturally depend upon our ability to utilize the cleared land at once, the weather, land contours, and other factors. It is our intention to keep twenty to thirty persons occupied with clearing, and two caterpillar deisel tractors equipped with KG blades, as weather permits. A minimum of five hundred acres should be cleared and put into production per year, and we hope to do far more.

VI Equipment Schedule:

The following is a partial schedule of the equipment which we expect to have operative within the first twelve months of the project:

- D 7 tractors with KG blades, pusher blades, electric winches
- 1 D 4 tractor with KG blades and electric winch
- 45 to 65 HP deisel tractor with Rome plow.

 disc plow, harrow, front end loader, trailer.

 combine, seeder, rotary slasher, post hole

digger, chain-drive trencher

- 1 4 wheel drive deisel dump truck
- 2 Land rover station wagons
- D 326 Caterpillar deisel engine with generator set, or similar equipment
- 2-3 Small "garden" tractors with rake, harrow, slasher Carpentry, mechanics, and machinist equipment

VII Construction and development schedule:

The total plan includes construction of group residential facilities for over five hundred persons; group dining and meeting facilities; mechanical, repair, and carpentry shops; storage facilities; generating facilities; poultry sheds, and animal barns; extensive roads over the area; and a railroad spur. The total plan will take several years to complete.

Clear and plant test fields of basic designated crops; extensive soil development and conservation

procedures.

F. Commercial animal husbandry:

Develop pasture and fience; develop animal feed; begin initial cattle herd with breeding stock.

G. Schools and other community services:

Make available teachers for local schools: make available nurses and medical equipment for local hospital and infirmary.

H. Ongoing Expansion:

Clearing additional land as time and weather permits.

VIII Social structure and integration with the community:

Peoples Temple is a collective. We are able to undertake this project, not because we are sponsored by a wealthy person or corporation, but because many people have combined their strength and economic resources to put them collectively at the service of humanity. It is a tribute to our Pastor Jim Jones that the organization exists to make this possible. We intend to live in centrally located multiple unit housing, with community dining facilities available. Our children will attend public schools. We will have teachers available to supplement the Port Kaituma staff, should the Department of Education desire, and trained paramedical personnel

available to work in the area as needed. Full participation in this plan will be open, and encouraged, to any Guyanese person who wishes to participate in the group lifestyle and discipline. We hope that the community will develop in such a manner that we can teach, and learn from Guyanese agriculturalists. We fully intend to participate in the activities of the larger Port Kaituma-Matthews Ridge area.

IX Conclusion:

This plan represents the thinking of the Peoples Temple
Team in Guyana, based upon information currently available.
We would appreciate suggestions as to how it may be improved
or corrected. Peoples Temple is committing its strength,
in human resources and finances to this project. We come
to stay and succeed. We feel that our project is a Guyanese
project. Our dream is the Guyanese dream, to become effective
as cooperative man.

Brief notes on alienation of Government and State Lands in the Republic of Guyana.

all applications for Government and/or State Lands in Guyana must be filed at the Office of the Douadssioner of Lands, Lands Department, Ministry of National Development and Agriculture, Lot 39, Brickdam, Georgetown.

Btate and Government Lands in Guyana way be granted under Lease, Licence or Permission for Agricultural, Residential, Cattle-grazing and other purposes. Leases require the approval of His Excellency the President of Guyana and are issued for a term of 25 years with the right of renewal for a further period of 25 years. Annual permissions to occupy State or Government Lands are issued by the Commissioner of Lands.

Applications for the extraction of timber and other Forest Operations (The Ming the operation of sawnills) within the Setlared areas must, therefore, be addressed to the Conservator of Forests, Ministry of Energy and Satural Resources, Kingston, George town.

The conditions of leases require definite minimum cultivation, livestock holding and/or other beneficial occupation of the land leased. In the case of woodcutting leases and licences an annual minimum extraction is required for the payment of an annual minimum royalty on the basis of 10 cents per acre. Conditions vary with the purpose for which the land is to be used.

Agriculture is concentrated mainly within the alluvial coastal belt which extends from the sea to about 30 miles inland where productivity is highest. This region is low lying and subject to flooding during the heavy rainy seasons. Control of water along the coast necessitates a system of canals, dams, sluices and sea or river defence. In many areas pumps are needed to irrigate as well as to get rid of surplus water.

Agriculture, however, is extending further inland and there are large areas of State Land suitable for agriculture, cattle-grazing and other purposes. Both the topography and the soil are different from the allevial coast. Communication in these inland areas is limited, but the possibilities are encouraging.

Sottle rearing on a large scale can be successfully pursued both on the Intermediate and Hinterland Savannaha.

This development charge waries from district to district depending on the volume of works which has been constructed and the cost of maintaining these works in a serviceable condition. This development charge exists mainly in Land Development areas. In areas where no and the second second of the second s services exist, the individual lessee will provide his own system The second secon of flood control and will not be requested to pay any development And the same was the same and t

Dad-

D'd like to express my feeling toward our decision last night. Frankly, D'was very disappointed that we decided to live. D'know D'm very selfish but D was getting very impatient at the debate over the whole thing -D wanted to do it right away. Especially when a blood bath is a certain reality -D voted to die now and will not have the responsibility of seeing our children go through the hell of battle or hear their sereams. Again D'm being selfish but it's hot death that D fear ... it's living... I do not want to live anymore!

I didn't cok about the other people who weren't here because I know that we many times as this has been seriously considered that arrangements for that have already been made - I apoligize for falling the decision on you. I still would have the masses committee secrets suicide and leave a deligation to meet the boot when they

come in.

It would be so beautiful to die a stry peacetul death with my family.

I'm so very sorry that we didn't go through with it. Please ourride the decision of those who are acraid to die before this traiter brings all hell down upon upon upon in not reflecting upon myself enough - but I don't want to live anymore enough - but I don't want to live anymore

D What would be my reaction if you were to suddenly be assassimized ordie. My gut immediate response is "revence": Revence firstmost those immediately response for your assassipation/denth. Then to avenue all of those who attempted to crueh - Peoples Temple i.e. Grace & Tim Storm Mertles L-Swarzy J-Cobb on & on. The would have to be goder under the direct, instructions of a leadership group or person for effectiveness of plot. These "quenging acts" it seems would lead be the inevitable to a total confrontation insolving our whole family, However I can usualize the possibility of a vangavirl ginup dving these necessary tasks. "underginum and still secure Jonestowns. The continuation ... of Jonestown would be the hard part. -- Because it has been your total commitment, and strategies that have kept our organization gray in a positive strain. Every day I become -- prove thouroughly convinced and disgusted of the total stallburness and self-centered ress of - the hornin race (myself included). This - realization increases my respect for you and - your untiring efforts to help a depending human race. I know muself that I could domy best to maintain under a new (designated by your leadership and continue to aid the work by following the principles and guidelines you have so corefully a thoroughly set. If this would be the collective decision I would help. This may mean "potting under the guis"

many 50-called followers who could not maintain. So be it. This cause is the vanguard and most solid functioning union of communism in existence. It has come to far to godown too soon. If it dues, it must be a shout heard world round. Shit—there is nothing worth living for the grip of imperialism of facism (Cia-ODEST) is so enmeshed in the world. There is only the battle to further the progress in the development of the Communist sind work. Jonestown by mere existence has asked the battle. Today tomorrow 2041s from now—you: we have not failed.

My Fears: Dying? No. My first confrontation wideath was the P.C. experience in S.F. last year. I was not sad or regretiful. 2rd time I st crisis in Jonestown. I saw the tears in your eyes and Jimmy's eyes and I knew the end was near. I was afraid, but anxious for the fight.

Last nervous sometimes when I amily a situation wilden a kimu such as the other night when we were at the house alone and the lights went out. Afra comforting them I quickly grabed for a guin. It was reaction intending for their afeit.

RITA LENIN--- I WOULD BE WILLING TO USE MY BODY ANYWAY DEEMED PROFITABLE TO THE ADVANCEMENT OF THE REVOLUTION. I WOULD BIVE MY BODY SEXUALLY TO GET INFORMATION, GIVE SOMEONE A CHANCE TO GET AWAY, OR TO INSTALL BOMBS ETC WHILE THE PERSON OR PERSONS WERE BEING DETAINED WITH this DEVERSION, I WOULD BE USED SEXUALLY TO KEEP SOMEBODY FROM DEFECTING AND BECOMING TRAITOROUS TO US, OR TO KEEP THEM FROM TALKING, TO ALLOW TIME FOR SOMEONE TO GET CHILDREN OUR, OR TO DETER A GUARD ETC. TO TAKE THE BURDEN FROM ONE PERSON, IF SOME ONE NEEDED A FUCK. IAM NOT YOUNG OR PRETTY, BUT MEN DON'T ALWAYS CARE IF THEY JUST WANT A FUCK. I KNOW NO ONE LIKES ME OR WANTS ME, SO THAT IS NOT IMPORTANT, ALL I WANT IS TO DO ALL I CAN FOR A REVOLUTION, NO EMOTIONAL INVOLMENT, ONLY THAT I CAN HELP THE REVOLUTION. I LEARNT A LOT FROM RICK C. (I MEAN THERE IS NOT ANY THING I COULD NOT DO AFTER BEING WITH THAT ASS HOLE.) I N MANY WAYS IT WAS AGOOD LEARNING EXPERIENCE, AS IF AN EMEMY TROED ANY SHIT LIKE THAT IT WOULD NOT BLOW ME AWAY, AND IAM GLAD I HAD THE EXPERIENCE AS VOMITIOUS AS IT WAS, CAUSE I FOUND OUT I COULD HANDLE A LOT OF THINGS. YOU CAN SHOOT ME AS AN EXAMPLE TO THE PEOPLE THAT THE ENEMIES MEAN BUSINESS, AND PERHAPS THIS WILL SHOCK THEM INTO THE STOCK REALITY THAT THIS IS SERIOUS BUSI INESS AND THE ENEMY IS SERIOUS, PERHAPS THEY WOULD GET THEIR HEADS TOGETHER AND REALIZE THAT THERE IS NOTHING IN ROMANCE AND THE ONLY THING THEY GOT GOING FOR THEM IS THE REVOLUTION. I WOULD LIKE TO BE TRAINED TO GO TO OTHERS COUNTRIES AND fight IN THEIR LIBERATION STRUGGLES. OR TO THE STATES AND RID US OF THE OPPRESSORS THERE. SOME OF THE SELL OUTS OF THE PEOPLE. I SAID, "I WILL SHE SAID" GOOD" IF WE WERE SENT OUT ON MISSIONS, MAYBE WE COULD HAVE STRICTNINE PILL ON US, JUST IN CASE SOMETHING AHEPPENS SO FAST ONE DOES NOT HAVE TIME TO KILL THEM SELVES ANOTHER WAY, THEN THEY WOULD BE SURE OF GETTING THE JOB DONE BEFORE THE ENEMY COULD STOP THEM. ONE THING I N MY FAVOR TO AN SIT FOR HOURS AND NOT SAY ANYTHING, AND IAM SO DAM STUBBORN, THAN I WOULDD DIE BEFORE I DONE WHAT SOMEONE TOLD ME TO DO. MY KIDS MAY HAVE TO DIE TOO, BUT GOD DAM IT THEY HAVE TO GO SOME DAY, AND AT LEAST THEY ARE LIVING FOR THE CAUSE, AND DYING FOR IT, SO I AM AT PEACE, HURT IT WILL BUT ALL OF LIFE IS A PAIN, AND THIS IS OUR DESTINY TO DO WHAT EVER WE CAN FOR the CABBE.

ERCADDAST OUT THIS MAJOR STRATEGY IN CASE OF A FINAL WHITE WIGHT

Sometimes it is impossible to know who is the enemy anymore. We have seen those who profess Socialism, who are not genuine. We have seen so much hypocrisy out of some who call themselves socialists. Thus, we are taking retribution of those we have absolute are hypocrits and the basest of beings. Many of them were terrorists who tried to suck us into violence, instead of building the non-violent socialist society we have built. We are doing this to aviod others being hurt by their sickness; therefore they must go down. You only know people who are complete degenerates from personal experiences. That is why we go for not heads of states. We do not seek to cause international tensions. We have absolute documentation on these people and they are on the side of everything indecent. They tried to starve out and otherwise destroy us by haring mercenaries to hurt or kill harmless, gentle seniors and beautiful children.

we tried to appeal to many to either return or live someplace in peace--free from the nightmare of this harassment. We have all decided in a sense as the old proverb said--"Born out of due season." We don't expect anyone to understand and we don't expect history to tread us fairly, but we have probed our conscience for hours and hours in many sessions. We could have been beneficial; at least, we had something to offer.

The many who wrote in our guest book saw sincerely a posceful socialist living cooperative, as esual as anything could ever be on earth.

At this stage we can't be concerned about what history has to say. We have to do what is best. Like an ancient tribe just below us, we had to do what we concluded best for us. We debated in town forum in open and free discussion until the few original dissenters concluded of their own volition that this was the course to follow.

We would have saved our children, if there had been any way possible, but our children became accustomed to an advanced social system of cooperative charing. Plus, how can they live when they would be told their parents and grandparents died. Though we are sure the true story could never be told—there was just no place for us. To could not hold out because too many things were being done against us. If you do research you will find that the age of conspirator is not dead, and heither is there as only to there who find the people who play unwittingly into the hards of conspirators by cynicism, apathy, or dispair. They are too willims to believe every—

thing that is told to them. If you believe in too much goodness, that puts a burden on you. There are some who don't want to see goodness because if they saw it they would feel too much compunction to emulate it in their own lives which they are unwilling to do.

IDEAS FOR LAST STAND:

- 1. To conservatives-gun control, don't take weapons out of control of the little people, when big governments have such devastating weapons they can use against whoever they choose. The ordinary person would be left helpless if he did not retain his right to a weapon.
- 2. To Christians--the world is corrupt, we have old, and children. We choose not to live. Use scriptures. The world is so corrupted, etc.
