PEOPLES TEMPLE SCHOOL

INTRODUCTION:

The Peoples Temple Agricultural Project is currently operating a school on the project, providing instruction for approximately 200 children in primary level (through 8th grade) and 150 young people in secondary level (grades 9 through 12.) The teaching staff numbers approximately 25. Many of these instructors are credentialed; some have administrators credentials and almost all have at least a four year college education, or graduate degree.

The school curriculum is well grounded in mathematics (including higher math), the sciences, politics, and history (including Guyanese History, of course.) Religious instruction is NOT provided, except in examples of how religion has been used as a tool of oppression. Marxism-Leninism, both in theory and practical application is the guiding philosophy of the school. A course in Marxist thought is required of all students and a main goal of every class is to tie academic knowledge to socialist principles so as to develop each young person into a fine representative of socialist ideology. I am enclosing a copy of a report prepared by our staff which you may already have that will more fully outline the school's curriculum and goals. One point to note at the outset is that our school functions on the work-study concept. The secondary students have classes for one half day, and then work on different projects: agriculture, electrical, mechanical, carpentry, etc. Their contribution to the project at this stage is not only helpful--it is essential.

The following is an outline of some factors that should be considered in any decision to transfer these students to the Port Kaituma School.

LEGAL:

At the outset, it should be noted that many of these young people have come to the project with the legal permission of their parent(s). The representatives of the Peoples Temple are acting as custodians of said children's welfare. In such cases the permission was given with the express understanding that Peoples Temple would be responsible for the young person's health and welfare, and that the child would be supervised by Temple representatives until such time as the parent came to Guyana. To take such children out of the project, and send them to a boarding school situation directly contravenes the conditions under which parental permission was given. Often such parents communicate with their children via radio. It would be difficult to explain to them why their children were living seven miles away and could not talk with them. In cases where families have moved to the project, the move was made with the understanding that the children's education would be provided on the project. In a sense the parents and the Peoples Temple have entered into a contractual arrangement, and it would create problems to now negate one of the prime considerations--education. We have asked each parent how they feel about the prospect of a move to the Kaituma school, and in each case the response was strongly negative.

HEALTH:

The Kaituma area is currently experiencing some serious health problems. Several cases of malaria have been reported and the child of one fine teacher died recently from gastro-enteritis. The school was without water for a few days last week. We have no doubt that these problems will be remedied in time and we are anxious to contribute to their solution, but we hesitate to send

JJ-1-a

our youth into such a situation, particularly as we are under such press scrutiny at this time. We are in the position of having to be extra careful in matters of health, etc., so that there will be no room for disparaging publicity about our level of care and concern, etc. For this reason, and of course because we are concerned about the welfare of our people, our extensive and highly qualified medical team conducts thorough and frequent check-ups of every member.

SELF-SUFFICIENCY:

Our goal is to make the farm entirely self-sufficient within three to five years. With the influx of people in recent months, we are under an even greater pressure to produce. As I mentioned in the introductory paragraph, our teenage students are an integral and essential part of our work force. In fact, without their part-time labor, we could not survive at this. In the future we hope to mechanize the farm to a greater extent, but budgetary considerations make this impossible for now. Moreover, we find that a combination of work-study is healthy and highly beneficial in developing a truly socialist consciousness. (Indeed, all teachers also spend part of their day in agricultural or other farm work.)

SOCIOLOGICAL CONSIDERATIONS:

A move to a new nation naturally entails a period of adjustment. Our young people for the most part are very bright and industrious. However, some of the brightest have come from broken homes and the terror and oppression of the ghetto. They need to feel a sense of community, and the security that such a community provides. They are learning to structure their lives productively; it would be a great mistake, we think, to place them in a school situation away from the project. Frankly, I do not think that many of the teachers at the Kaituma school, although no doubt sincere, could cope with some of our youth--particularly those who have grown up in the tough streets of the inner cities. Our young people are very excited about their new home. They want to know everything about Guyana and for some the experience at the project school represents the very first time they have ever had a positive encounter with education. A change at this time would be counterproductive.

In addition to the problems such a move would create for the students, we think that a premature, sudden influx into the Kaituma school, would create problems in the surrounding community as well. We have been building our relations with the Kaituma community in many positive ways: participating in the local PNC meetings and activities, exchanging films, providing emergency medical care, repairing vehicles without charge, etc. A deluge of highly independent young people who are still in the process of adjusting to a new land could only be disruptive of good relations.

PUBLIC RELATIONS:

Underlying all the above considerations is the ever present reality that we are under strict scrutiny by the most reactionary elements of the North American press. Minor difficulties which would be considered the normal course of events if associated with any other organization, are magnified and sensationalized by the capitalist press. One case of malaria, one parent who cannot reach his or her child on the radio, etc. can mean a significant public relations problem. It is clear that, in the eyes of some sectors of United States society, we have committed the ultimate "insult" by choosing to live in a Third World socialist nation. We do not want to lend ourselves to being used as a vehicle for criticism of Guyana. The conspiracy which is working against us is, from all indications, seeking to discredit our organization and Guyana as

J J-1-5

well. It would seem in the best interest of all to avoid creating situations which could be easily exploited by participants in this political conspiracy.

KIDNAPPING:

One of the key figures in this conspiracy, a man named Mazor who has an extensive criminal record, told a person whom he did NOT know to be friendly to us that because there was no legal-way of getting children back from Guyana (all children having come here legally) the only recourse would be kidnapping. We recognize that such a venture might be difficult, but with proper funding it would not be impossible. Naturally we would not want to put our youth in a situation that would leave them vulnerable to any kidnapping venture.

PURPOSES OF MARCO
MEDICAL AMATEUR RADIO COUNCIL, LTD.

The Council was formed as a scientific membership corporation designed to meet your medical-electronics and radio communication needs.

The major purpose of MARCO is to establish personal communication among its members and their ham colleagues for dissemination of factual medical, electronics and communication information both theoretical and practical.

MARCO has identified itself with doctors in the United States and Canada and countries outside of the United States where there are doctor hams. The members get to know their colleagues and develop such professional, avocational and social associations as they may desire.

For those interested in service and emergency public assistance, nets may be established. Here lies a great opportunity for public service of benefit to medicine, amateur radio and humanity. These nets will be developed to the extent of MARCO member capabilities and desires.

MEMBERSHIP REQUIREMENTS

REGULAR MEMBERS: Regular members are licensed amateur radio operators who are either (1) licensed and qualified in the United States as Doctors of Medicine, Doctors of Dental Surgery, Doctors of Dental Surgery and Medicine, Doctors of Veterinary Medicine or Doctors of Osteopathy or (2) holders of equivalent foreign degrees and licenses, or (3) holders of doctoral degrees and are practicing in one of the related paramedical sciences.

ASSOCIATE MEMBERS: Associate members are licensed radio operators who are regular students in recognized and fully accredited Schools of Medicine, Dentistry, Veterinary Medicine and Osteopathy.

EMERITUS MEMBERS: Emeritus members are regular members in good standing, who shall be retired from active practice of their professions, who shall have performed some outstanding service to the Council.

HONORARY MEMBERS: Honorary members are individuals not meeting the requirements for any class of membership, but who contribute to the Council in a manner approved by the Board of Directors.

AFFILIATE MEMBERS: Affiliate members are individuals who are licensed amateur radio operators or are any of the following: (1) licensed and qualified in the United States as Doctors of Medicine, Doctors of Dental Surgery, Doctors of Dental Surgery and Medicine, Doctors of Veterinary Medicine or Doctors of Osteopathy, or (2) holders of equivalent foreign degrees and licenses, or (3) holders of doctoral degrees in and are practicing in one of the paramedical sciences.

All members except Honorary members and Affiliates have full voting privileges.

ANNUAL DUES	Regular members	\$20.00	Affiliate members	\$10.00
	Associate members	10.00	Members not residing in U.S.A - 1/2 rate	

Applicants elected to membership during the months of September, October, November or December in any one year pay the annual dues which is credited to the following year.

Application for and further information regarding membership may be obtained from William L. Sprague, M.D. - WA6CRN, Secretary, MARCO, 433 North 4th Street, Montebello, California 90640.

PEOPLES TEMPLE AGRICULTURAL MISSION

Jonestown, Port Kaituma, N.W.D., Guyana
Direct correspondence to: P.O. Box 893, Georgetown.

17th August, 1976

Mr. Lambert Philadelphia,
Executive Chairman of Information
& Communication Services,
Brickdam, Stabroek,
Georgetown.

Dear Sir:

Peoples Temple is seeking permission to import and operate printing equipment (see attached list) in Guyana.

Peoples Temple is a large religious organization in the United States with a mailing list of hundreds of thousands of persons. Over the years, this has been a method of reaching people all across the United States about social concerns and to raise funds for the many humanitarian projects (i.e. free legal aid, senior citizen homes, child care homes, etc.) that the Temple has operated. Solicitation of contributions by mail request has netted about U.S.\$10,000 per month. This has been a considerable source of support for the agricultural project in the North West Region of Guyana since it was begun by Bishop Jim Jones nearly three years ago.

We would like to continue this method of reaching the people in the U.S. and solicitation of funds for the agricultural project by mail from here, using the same equipment and format that are now utilized in the United States.

It is in no way our intention to compete with or to supplant any present service or facility in Guyana. Our desire is to use it only for activities outside of Guyana. Our facilities would be available for inspection at any time. The printed material would neither contradict government policy nor embarrass the government of Guyana in any way. We assure you of our support and wish the printing equipment to be imported as a means of furthering the agricultural program.

Many persons from the U.S. will be joining the workforce of the agricultural mission in the very near future. It is therefore expedient to continue raising funds for the project until such time as it becomes self-sufficient, which won't be for some time.

We have several skilled persons to operate the equipment and they put out a high quality in-printed materials. It has also provided a training program in a skilled trade to the young.

JJ-12 -

Page 2

We would appreciate any assistance you might be able to give us on importing the equipment and will be awaiting your early reply. Should you need any clarification, I can be reached at: 121 Third Street, Alberttown, Georgetown (60787). Thank you.

Cooperatively yours,

Paula Adams,
Administrative Secretary

55-12-3

Peoples Temple currently produces for its own needs in printed materials by means of a small in-plant print shop. The reasons for this have been to save money, promote self-sufficiency, and provide a training program in a skilled trade to the young. The planned use of this equipment in Guyana would be to maintain these functions, and later could also be used to raise funds to augment the agricultural program. The current use is as follows:

- a. Publication of newsletters and other correspondence to the church membership by means of the mail. (which we would be more than happy for you to see.)
- b. Publication of the various organization forms, schedules, and charts used in the administrative work of the church.
- c. Processing and printing of photographic film for pictures and slides.

The equipment used to do this is:

1. Multi 1250 - Offset Duplicator prints sheets up to 8½ x 14" and envelopes. \$1,000
2. Davidson 600 - Offset Duplicator prints sheets up to 11 x 17" \$3,500
3. Davidson 700 Perfecto - Offset Duplicator prints sheets up to 15 x 17" on both sides of them sheet in one pass through the press. \$10,000
4. Roll Converter - attaches to the 600 & 700 Duplicators and allows them to feed from roll stock rather than sheets. \$600
5. Mu-Arc Platemaker - used to expose metal plates for the press from film negatives \$200
6. Ricoh Graphic Electronic Platemaker - makes short-run paper plates for the Multi-1250 \$1200
7. Dexter-Cleveland Folder ATC 1824 - folds paper up to 18 x 24" in tow directions in one pass through the machine. Also perforates \$600 and scores.
8. Phillipsburg Inserter - inserts and seals envelopes up to #10 size \$2400
9. Scriptomatic Addressor - addresses envelopes for mailing by means of carbon stencil and transfer fluid. \$200
10. Clydesdale Process Camera - enlarges and reduces film negatives for making printing plates \$3500
11. Beseler Photo-Enlarger - used for printing photographs from negatives \$250
12. Other Dark-Room equipment trays, film reels, and safe lights, etc. \$400

AMERICAN RADIO RELAY LEAGUE, INC.

PUBLIC SERVICE AWARD

THIS IS TO CERTIFY THAT ALBERT A. TOUCHETTE, WB6MID/8R3

has been issued this award in recognition of outstanding emergency communications

ADMINISTRATIVE HEADQUARTERS NEWINGTON, CONNECTICUT, U.S.A. 06111

OFFICIAL

Greetings!

Your operation noted by the attached certificate is considered by us a contribution to the public service record of the amateur. ARRL accordingly presents this certificate to you with congratulations and thanks.

The Public Service Certificate is not the type of award that is specifically worked for, asked for or expected. It comes as a spontaneous recognition of outstanding work by individual amateurs during communications emergencies. It should give you deep satisfaction to know that the type of work you have done best exemplifies the spirit which makes amateur radio a valuable asset to the public and to the nation.

The issuance of this certificate and the services for which it was issued have been recorded in a permanent card file of all such services by amateurs. We hope that you will continue your work along emergency communications lines and that you will take an active part in the preparedness program of your Amateur Radio Emergency Service.

73.

JJ-14-a

TO THE LICENSEE:

The facts set forth herein indicate that you have violated the requirements of law or treaty. This Notice is issued in accordance with Section 1.89 of the Commission's Rules.

1. Within 10 days from receipt of this Notice, a written reply in DUPLICATE shall be addressed to "Federal Communications Commission" and SENT TO THE ADDRESS SHOWN ON THE FACE HEREOF AT THE TOP OF THE PAGE. DO NOT address your reply to an individual.
2. **MAKE CERTAIN THAT YOUR ANSWER:**
 - a. Fully explains each violation.
 - b. Specifically describes the action taken to correct and to prevent continuation or recurrence of each violation.
 - c. Is identified as a reply to this Notice. Include the call sign of your station so that your answer may be properly associated with the station file.
 - d. Does not refer to a reply to another notice, but is complete in itself.
 - e. Is dated and is signed by the licensee or, if appropriate, an officer of the licensee.
 - f. Includes all the information requested above in addition to any other information requested in Items 3 and 4, below.
3. **CHANGE OF ADDRESS:**
If the address appearing in Block 1 on the face of this Notice is not your correct address for receipt of mail, include the correct address in your letter of reply to this Notice.
4. If an "X" appears in the box preceding any of the following instructions, comply with the instruction(s) so indicated and submit the information together with the above described letter.
 - b. State the name of the person who operated the transmitter at the time of the violation. Does this person hold an operator license or permit issued by the Federal Communications Commission?
 - c. A second copy of this notice is enclosed for the operator to answer the following questions thereon. That copy must then be submitted with the letter of reply described in Item 2 above from the person addressed on the face of this notice. **RETAIN THE ORIGINAL OF THIS NOTICE.**

I, the undersigned, was the operator on duty at the time of the violation noted herein, and hereby acknowledge this NOTICE. I hold FCC-issued Radio Operator (Not Station) License or Permit as follows (if none, so state): _____

Number (If unnumbered, so state): _____

Issuance date: _____ Birth date: _____

Name (print): _____

Address: _____

Signature: _____

**NOTICE REQUIRED BY THE PRIVACY ACT OF 1974, P.L.
93-579, DECEMBER 31, 1974, 5 U.S.C. 552a(e)(3):**

The staff will use all relevant and material information before it, including the information disclosed in your reply, to determine what if any enforcement action is required to ensure current and future Rule compliance.

Willful or repeated Rule violation or failure to reply may result in a monetary forfeiture or license revocation.

OFFICIAL JOURNAL

September 26, 1977

Mr. Benjamin F. Bowers, WA6DTJ
Box 434
Redwood Valley, CA 95470

Dear Mr. Bowers:

We at Headquarters have received an inquiry concerning your net and the traffic you are handling with WB6MID/8R1 and WB6MNH/8R3. Some question has been raised as to the nature of the traffic that is being handled in your QSOs, and I wonder if we might impose on you for a note at your early convenience.

We look forward to your reply.

73.

Cordially,

Bruce Alan Johnson, WA6IDN/WA1ZQP

To: Paulo
From Ben
Re: My Amateur Radio License

I have a General Class Amateur Radio License (class B)

Acquiring the license: (test requirements)

- passed 13 words per minutes plain language International Morse Code sending and receiving test at an FCC test center

- passed written examination (50 questions) covering general operating practices and regulations (74% or higher)

Operating privileges:

80 meters band 3.525 - 3.775 mhz cw & rtty (code & teletype)
3.89 - 4.0 mhz cw & voice

40 meters band 7.025 - 7.15 mhz cw & rtty
7.225 - 7.3 mhz cw & voice (mhz = megahertz)
 (voice = AM, FM, DSB, SSB)

20 meters band 14.025 - 14.2 mhz cw & rtty (our best bet for communications)
14.275 - 14.35 mhz cw & voice

15 meters band 21.025 - 21.25 mhz cw & rtty (good bet also)
21.35 - 21.45 mhz cw & voice

10 meters band 28.0 - 28.5 mhz cw & rtty.
28.5 - 29.7 mhz cw & voice

JJ-20-a

I am studying for another higher class of license
that will offer wider frequency privileges on each of
these band segments.

5. (a) Number of persons normally available to operate the apparatus.

(b) Nationality of these persons (e.g. 2 British, U.S.A.).

(c) If any of these persons has had previous experience in operating radio stations, please give details.

6. Name and qualifications of:-

(a) Person it is proposed will install the apparatus.

(b) Person it is proposed will maintain the apparatus.

7. Receiving apparatus-
(Give details for each separate receiver).

(a) Make or type

(b) Frequency range (in Hz/s):

(c) Power supply necessary to operate receiver (e.g. 110 volts AC 6 volt battery etc.)

8. Transmitting Apparatus-
(Give details for each separate transmitter).

(a) Power delivered to aerial (or D.C. input power to the valve(s) to which the aerial is coupled).

(b) Frequency range (in Hz/s) assuring necessary crystals available.

(c) Operating Frequency.

(d) Power supply necessary to operate transmitter. (e.g. 110 volts AC, 50 cycles, 1 phase; 6 volt battery, etc.)

(e) Technical details of transmitter (or producer manufacturers specification or operating indications for inspection).

9. Masts and aerials it is proposed to use:-

(a) Number and height.
(e.g. 2-30' 2-40')
(if aerials (s) to be supported on building please indicate.)

55-21-d

(b) Description of each aerial to be erected.
(e.g. Transmitting - horizontal dipole, 60' in length, mean height above ground 30', centre fed 600 ohms open wire feeder).

10. Power Source, normal and emergency if any:-

(e.g. Normal - from Bauxite Co. power mains,
Primary - 100 volts, 3 phase, 60 cycles;
Secondary - 100 volts, 1 phase, 60 cycles).

5kVA Diesel-driven generator 110 volts, 30 cycles, 1 phase.

Emergency - 24 volt battery charged from 1.5 kw petrol engine driven generator).

Karlsruhe, NW D Germany
For Radio Telegraphs
Communication with its
Laramie Office

Dear Sir,
Please see our previous message re 12/5/74 concerning
transmitting news bulletins occasionally to install a Radio
TELEGRAPH AT ITS GERMANY, AND AT ITS LARAMIE
OFFICE.

THE PROJECT LOCATED IN THE NORTHWEST DISTRICT.
ASSOCIATION: I refer to the association of
BET KARLSRUHE THE COOPERATION IS VERY DESIRABLE A
LARGE ASSOCIATION PROJECT AND RELATE THESE WITH
THE USE OF ABOVE EQUIPMENT. COMMUNICATIONS BY
TELEGRAPH WILL SOON BE PROVIDED THROUGH THIS PROJECT.
THIS COMMUNICATION IS PLANNED WITH Laramie
ON A STAND ALONE OR SHARED, FULL, BIDIRECTIONAL
AND SCANNING MUST BE SENT IN BIDIRECTIONAL AND
SCANNING AND DATA THROUGH THE Laramie OFFICE.
THIS PROJECT IS REQUESTED THE WORK AND
CONTINUOUS SUPPORT.

THE TOTAL WORK AREA OF THE PROJECT IS
approximately twelve daylight hours working in
the field stations land, equipment and software we
have been assigned to the above during a
given time lists of names and place names
names are needed. It is for this reason
that communication and the work is done in
55-238

THE ECONOMIES, THAT WE ARE REQUESTING A
24 HOUR RENT. THAT WAY, 16,000 DOLLARS
A TRACTOR PORT SHOULD REACH THE HARBOR
COSTS US TO HARBOR THAT IS, THE
PORT AUTHORITY IN THE HARBOR, NOT FOR THE
HARBOR PORT THAT WOULD ADD UP TO
THE SAME AMOUNT.

WE ALL DESIRE TO RENT UNITS
FROM THE CORPORATION, IF SUCH ARE AVAILABLE,
OR TO PURCHASE OUR OWN IF RENTAL UNITS ARE
NOT AVAILABLE.

1. Geographical position, in degrees and minutes, of proposed station (if known)
2. (a) Nearest important centre or town to the proposed station.
(b) State if land-line telephone or telegraph communications will exist between the station and the centre or town.
3. (a) Nature and purpose of the radio communications for which the station is required.
(b) Hours during which communications normally will be required:
 - (1) Daytime
 - (2) Nightime only
 - (3) Day and Night
any other details
4. Licence is required for a permanent station temporary.
If "temporary", give details.

5. (a) Number of persons normally available to operate the apparatus.

(b) Nationality of these persons (e.g. 2 British, 1.U.S.).

(c) If any of these persons has had previous experience in operating radio stations, please give details.

6. Name and qualifications of:-

(a) Person it is proposed will install the apparatus.

(b) Person it is proposed will maintain the apparatus.

7. Receiving apparatus:-
(Give details for each separate receiver).

(a) Make or type

(b) Frequency range (in Mc/s)

(c) Power supply necessary to operate receiver (e.g. 110 volts AC 6 volt battery etc.)

8. Transmitting Apparatus:-
(Give details for each separate transmitter).

(a) Power delivered to aerial (or D.C. input power to the valve (s) to which the aerial is coupled).

(b) Frequency range (in Mc/s) assuring necessary crystals available.

(c) Operating Frequency.

(d) Power supply necessary to operate transmitter. (e.g. 110 volts AC, 50 cycles, 1 phase; 6 volt battery, (etc.)

(e) Technical details of transmitter (or produce manufacturers specification or operating indications for inspection).

9. Masts and aerials it is proposed to use:-

(a) Number and height.
(e.g. 2-30' 2-40')
(if aerials (s) to be supported on building please indicate.)

Application for a Licence to install and
use Radio Transmitting and Receiving Apparatus
(Post and Telegraph Ordinance, Chapter 132 Section 63)

Date

The General Manager,
Guyana Telecommunication Corporation,
Georgetown.

Application is hereby made for a licence to be granted
to to install and use
radio transmitting and receiving apparatus at

To the best of my knowledge and belief the information
furnished in the subjoined Schedule is correct.

Signed:.....

Address:.....

.....

SCHEDULE:

1. Geographical position, in degrees and minutes, of proposed station (if known)
2. (a) Nearest important centre or town to the proposed station.
(b) State if land-line telephone or telegraph communications will exist between the station and the centre or town.
3. (a) Nature and purpose of the radio communications for which the station is required.
(b) Hours during which communications normally will be required:-
(1) Daytime
(2) Nightime only
(3) Day and Night
any other details
4. Licence is required for a permanent station temporary.
If "temporary", give details.

(over)

JJ-27-9

5. (a) Number of persons normally available to operate the apparatus.
(b) Nationality of these persons (e.g. 2 British, 1 U.S.).
(c) If any of these persons has had previous experience in operating radio stations, please give details.
6. Name and qualifications of:-
(a) Person it is proposed will install the apparatus.
(b) Person it is proposed will maintain the apparatus.
7. Receiving apparatus:-
(Give details for each separate receiver).
(a) Make or type
(b) Frequency range (in kc/s).
(c) Power supply necessary to operate receiver (e.g. 110 volts AC, 6 volt battery etc.)
8. Transmitting Apparatus:-
(Give details for each separate transmitter).
(a) Power delivered to aerial (or D.C. input power to the valve (s) to which the aerial is coupled).
(b) Frequency range (in kc/s) assuring necessary crystals available.
(c) Operating Frequency.
(d) Power supply necessary to operate transmitter. (e.g. 110 volts AC, 50 cycles, 1 phase; 6 volt battery, (etc.).
(e) Technical details of transmitter (or produce manufacturers specification or operating indications for inspection).
9. Masts and aerials it is proposed to use:-
(a) Number and height.
(e.g. 2-30' 2-40')
(if aerials (s) to be supported on building please indicate.)

55-23-L

(b) Description of each aerial to be erected.
(e.g. Transmitting - horizontal dipole, 60' in length, mean height above ground 30', centre fed 600 ohm open wire feeder).

10. Power Source, normal and emergency if any:-
(e.g. Normal - from Dem. Bauxite Co. power mains,
Primary - 100 volts,
3 phase, 60 cycles;
Secondary - 100 volts,
1 phase, 60 cycles).

Or

5kVA Diesel-driven generator 110 volts,
50 cycles, 1 phase.

Emergency - 24 volt battery charged from 1.5 Kw petrol engine driven generator).

POST AND TELEGRAPH ORDINANCE, CHAPTER 132
APPLICATION FOR SHIP RADIO LICENCE
TO - The General Manager, Guyana Telecommunication Corporation, Georgetown

Date:
[]

Application is hereby made for a Licence to install and work
apparatus for Wireless Telegraphy on board the ship or vessel, the particulars
of which are subjoined and which are correct to the best of my knowledge and
belief.

.....
..... (Signed),
..... (Office),
..... (Address),
..... (Nature of use to sea or land, etc.),
..... (Name of ship),

Particulars of ship for which Radio Licence is requested

1. Name of Ship: Codyside
2. Port of Registration: San Francisco, U.S.A.
3. Gross Tonnage: 71
4. Name and Address of Owner: Marine Transport Co. Inc., 125 West 42nd Street, New York, N.Y., U.S.A.
5. Visual 4-letter signal (if allocated): M/A
6. Class of Ship: Passenger Passenger and cargo
 Cargo Fishing Art-Bar
 Surveying
7. Nature of voyage or tour: (Cross out which does not apply)
and state if you require further information if necessary)
8. Stations with which it will be desired to communicate: SOULY, GUYANA, ORANGE, BONNIE, BONAIRE
9. Nature of message to be sent and received: TELEGRAMS, TELETYPE, TELEGRAPHIC
10. Type of Transmissions: By Radiotelegraphy, By Radiotelephone
(cross out which does not apply).
11. Please state name and rank of each person whom it is desired be
authorised to operate the apparatus. Give details of Operator's
certificate (issued under the Radio Regulations) held by such person
or persons.

.....
[]

JJ-24

Particulars of the apparatus it is proposed to install and work.

Particulars of Apparatus
Preferably attach manufacturer's description or specifications
(which will be returned if required).

Alternatively, furnish the following details in respect of all
equipment.

(a) Each Transmitter:

- (i) Manufacturer's name.
- (ii) Frequency range (Kc/s)
- (iii) Type Number.
- (iv) Power in the aerial of the unmodulated carrier wave.
- (v) Number of channels easily available by simple switching.
- (vi) State if "type approved" by one of the following authorities:-

United Kingdom & Post Master General.

Australia - Dept. of Posts

Canada - Dept. of Transport

United States - Federal Communication Commission

- (vii) Give details of power supply necessary to operate the transmitter.

(b) Each Receiver:

- (i) Manufacturer's name
- (ii) Type of receiver
- (iii) Frequency range
- (iv) Give details of power supply necessary to operate the receiver.

- (c) The following apparatus may not be installed and worked unless specifically prescribed in the license.

Attach details of any such apparatus which is required to be installed and worked.

(i) Emergency radio apparatus

(ii) Radio apparatus in lifeboats and other survival craft.

(iii) Radar installation.

6. Class of Ship: (a) Passenger (b) Passenger and Cargo
(c) Cargo (d) Fishing (e) Tug
(f) Surveying
(Cross out which does not apply)
(insert further information if necessary)
7. Stations with which it will be desired to communicate:
8. Nature of message to be sent and received:
9. Type of Transmissions: By Radiotelegraph. By Radiotelephone
(cross out which does not apply).
10. Please state name and rank of each person whom it is desired be
authorised to operate the apparatus. Give details of Operator's
certificate (issued under the Radio Regulations) held by such person
or persons.

II-25

Particulars of the apparatus it is proposed to install and work.

Preferably attach manufacturer's description or specifications (which will be returned if required).

Alternatively, furnish the following details in respect of all equipment—

(a) Each Transmitter:

(i) Manufacturer's name.

(ii) Frequency range (Kc/s)

(iii) Type Number.

(iv) Power in the aerial of the unmodulated carrier wave.

(v) Number of channels easily available by simple switching.

(vi) State if "type approved" by one of the following authorities—

United Kingdom - Post Master General

Canada - Dept. of Transport

United States - Federal Communication Commission

(vii) Give details of power supply necessary to operate the transmitter.

(b) Each Receiver:

(i) Manufacturer's name.

(ii) Type of number.

(iii) Frequency range.

(iv) Give details of power supply necessary to operate the receiver.

(c) The following apparatus may not be installed and worked unless specifically prescribed in the Licence.

Attach details of any such apparatus which is required to be installed and worked.

(i) Emergency radio apparatus.

(ii) Radio apparatus in lifeboats and other survival craft.

(iii) Radar installation.

Ref: MHA/S.2/21/01
dated 19th May, 1972

TECHNICAL DATA FOR SUBMISSION WITH
APPLICATION FOR THE IMPORTATION OF
WIRELESS AMATEUR TRANSCEIVERS.

(1) State whether unit is a "H.F." (High Frequency), "V.H.F." (Very High Frequency) or "U.H.F." (Ultra High Frequency).

(2) State whether unit can receive and transmit on "S.S.B." (Single Side Band), "A.M." (Amplitude Modulation), "C.W." (Continuous Wave) or any form of combination of the three modes of transmission.

(3) State frequency range of each channel or band e.g. :-

Channel 1 from 4MHz to 4.5MHz

* 2 * 7MHz to 7.5MHz

* 3 & 14MHz to 14.5MHz

.....
.....
.....

(4) State whether the channels are:-

(a) Fixed (Crystal Controlled) or

(b) Tunable (can tune through frequency range by operator).

(5) State operational frequencies of which "FIXED" channel unit will transmit and receive, e.g.: -

Channel Transmit Receive

1 4MHz 4MHz

2 7MHz 7.35MHz

3 14MHz 14.25MHz

.....
.....

(6) State R.F. power output of transmitter, e.g.: -

(a) On S.S.B. 20 watts

(b) On A.M. 5 watts

Page 1-8

51. Which one of the following does not express a fundamental principle of the Amateur Radio Service?
A. The ability of the amateur to contribute to the advancement of the radio art.
B. Advancement of skills in both the communication and technical phases of the art.
C. Expansion of the existing reservoir of trained amateur radio operators, technicians, and electronic experts.
D. Continuation and expansion of the amateur's unique ability to enhance international goodwill.
 E. Expansion of the reservoir of individuals trained in the International Morse Code.
52. Amateur radio communication is defined in the Rules as
A. communications by or among amateur radio stations intended to enhance the financial interests of individuals or clubs.
B. commercial radio communications by or among amateur radio stations of different countries.
C. noncommercial radio communication by amateur radio stations primarily for the benefit of a third party.
 D. noncommercial radio communication among amateur radio stations solely with a personal aim and without pecuniary or business interests.
E. communication by or among amateur radio stations licensed by the Commission for civil defense purposes only.
53. Radio communication conducted from the geographical land location shown on the station license is known as
A. portable operation.
B. secondary station operation.
 C. fixed operation.
D. mobile operation.
E. none of the above.
54. Which one of the following is not permitted by the Rules?
A. Communication between amateur stations and stations in other services licensed by the Commission for purposes of civil defense during emergencies.
B. Bona fide emergency drill practice transmissions.
C. Round table discussion or net-type operations where more than two amateur stations are participating.
D. Code practice transmission solely for the purpose of learning or improving proficiency in the International Morse Code.
 E. Radio communication between amateur stations of different countries if objected to by the administration of one of the countries.
55. A basic prohibition in the operation of an amateur station is that
 A. an amateur station shall not be used to transmit or receive messages for material compensation.
B. an amateur station shall not be used for the transmission or reception of third party traffic.
C. an amateur radio station shall not be used to transmit or receive messages of a personal nature on behalf of the station licensee or his immediate family.
D. an amateur radio station shall not be operated by anyone other than the station licensee.
E. an amateur station shall not be used to transmit or receive communications relating to the technical performance, capabilities, or testing of any transmitter or radio equipment.

JS-28-a

ELEMENT 3

Read each question carefully, then select *only the one best answer from the five choices.*

Doula Jean Adams

Page 2-B

56. The Rules define third party traffic as amateur radio communication by or under the supervision of the control operator at an amateur radio station on behalf of anyone other than
A. a licensed amateur radio operator.
B. a citizen of the United States.
C. the station licensee.
D. a member of the immediate family of the station licensee.
 E. the control operator.
57. In the event a violation of the Rules occurs at an amateur station in which a third party is participating, the individual to be held accountable is
 A. the station licensee and, if he is other than the station licensee, the control operator.
B. the third party.
C. the third party and the control operator.
D. the control operator.
E. the station licensee and the third party.
58. Which one of the following is not included in the log for each amateur radio station?
A. The signature of the control operator on duty and the call sign of his primary station.
B. The date and time periods the duty control operator was other than the station licensee.
 C. The names of all parties with whom radio communication is achieved.
D. The dates an amateur station is put into or taken out of service.
E. A notation of third party traffic sent or received.
59. The control point for an amateur radio station is defined in the Rules as
 A. the operating position of an amateur radio station where the control operator function is performed.
B. a location licensed solely for the remote control of another radio station.
C. the control of transmitting apparatus from a point other than the one at which the transmitter is located and immediately accessible.
D. a separate amateur radio station for use by members of a bona fide amateur radio society.
E. a station licensed for the automatic retransmission of radio signals of other amateur stations.
60. Which one of the following is not a control operator requirement as specified in the Rules?
 A. An amateur station may only be operated in accordance with the privileges authorized to the station licensee.
B. Every station when in operation shall have a control operator at an authorized control point.
C. Each control operator shall also be responsible for the proper operation of a station.
D. The control operator and the station licensee may be the same.
E. A third party may participate in amateur radio communications with the permission of the station licensee provided a control operator is present and continuously monitoring the communications from the station.

Page 3-B

61. Which one of the following statements represents a practice which is not prohibited by the Rules?
- A. The transmission by radio of messages in codes or ciphers in domestic and international communications to or between amateur stations.
 - B. The transmission or reception of messages for material compensation.
 - C. The dissemination of radio communications intended to be received by the public.
 - D. Third party traffic involving compensation to a station licensee.
 - E. International third party traffic with countries in which a third party agreement is in force.
62. Which one of the following complies with the station identification requirements for amateur radio station W7XXX in mobile operation using radio telephony in Los Angeles, California?
- A. "this is W7XXX".
 - B. "this is W7XXX in Los Angeles, California".
 - C. "this is W7XXX operating mobile".
 - D. "this is W7XXX mobile".
 - E. "this is W7XXX mobile 6".
63. Which one of the following is not a true statement regarding amateur license examinations by mail?
- A. The holder of an amateur license obtained by mail may be required to appear for a Commission supervised examination.
 - B. An amateur Extra or Advanced Class license may be obtained by mail in the event the applicant has a protracted disability.
 - C. Failure to appear for a Commission supervised examination, if requested to do so, results in cancellation of the amateur's license.
 - D. The holder of a Conditional Class license must appear for a Commission supervised examination if he moves to within 175 miles of a regular examining office.
 - E. A Conditional Class license may not be renewed if the holder of the license has moved to within 175 miles of a Commission examining office.
64. When a Conditional Class licensee is designated to be the control operator of a station licensed to an Extra Class licensee, he may not
- A. use the Extra Class operator's station call sign.
 - B. engage in any third party communications.
 - C. tune or adjust the station transmitting apparatus.
 - D. use the frequency 51.50 MHz for transmitting with F2 emission.
 - E. operate on a frequency reserved for Extra Class licensees.
65. In the event a situation, not specifically covered by the Rules, arises during the operation of an amateur radio station, the operator should
- A. cease all operations immediately.
 - B. ignore the problem and continue operating.
 - C. discontinue operations and call the Engineer in Charge for the district in which station is located.
 - D. continue operating, but only in accordance with good engineering and good amateur practice.
 - E. continue operation, but file a written notice within 72 hours to the Commission's Engineer in Charge for that district.

Page 4-B

66. Which one of the following must assume full responsibility for the proper operation of an amateur radio station where a third party is operating?
 - A. The control operator.
 - B. The control operator and the station licensee if other than the control operator.
 - C. The station licensee.
 - D. The third party permitted to operate the station.
 - E. The control operator, if other than the station licensee, and the third party.
67. Which one of the following is permitted during a general state of communications emergency?
 - A. Transmission by designated stations, on frequencies immediately adjacent to emergency bands, for the purpose of advising other stations of the existence of the emergency.
 - B. Incidental calling, testing, or working in bands designated as emergency communication bands.
 - C. Discussions with other stations by designated emergency stations which go beyond furnishing essential facts relative to the emergency.
 - D. Transmission by designated stations on emergency bands, to assist in the promulgation of information relative to the emergency if interference to essential emergency traffic occurs as a result.
 - E. Transmitting by non-designated stations on emergency bands to warn non-complying stations observed to be operating in those bands.
68. "Long path" radio communications in the amateur 40 meter band would most generally be associated with
 - A. the time of day.
 - B. the ionization layers above the earth.
 - C. sunspot activity.
 - D. aurora effects.
 - E. the equinoctial seasons.
69. Which one of the following statements characterizes radio wave propagation for the 20 meter band during the period of maximum sunspot activity?
 - A. Ionospheric propagation during this period is virtually unknown.
 - B. World wide communications during the day and almost no communications at night.
 - C. Usually "dead" for long distance communications at the peak of sunspot activity.
 - D. Good world wide reception during most of the 24 hours.
 - E. There is very little skywave reception during the daylight hours.
70. Which one of the following is not considered beneficial in minimizing interference and congestion on amateur frequency bands?
 - A. Monitoring of transmissions to immediately detect any malfunction.
 - B. Using minimum occupied bandwidth for the type of emission being used.
 - C. Using a dummy antenna for tuning and adjustments of a transmitter.
 - D. Monitoring of frequencies prior to use to determine the feasibility of transmission without causing interference.
 - E. Using the maximum transmitter power available to overcome possible interference with the reception of signals transmitted from a station.

Applicant must sign here

Page 5-B

71. Which one of the following refers to frequency or phase-modulated telephony?
- A. F8.
 - B. A3.
 - C. F3.
 - D. F2.
 - E. A4.
72. The designator A8 represents
all of this is good
except for the last
one
 - A. a steady unmodulated carrier.
 - B. telegraphy by the on-off keying of an unmodulated audio frequency.
 - C. double sideband telephony.
 - D. a single sideband suppressed (zero) carrier transmission.
 - E. telegraphy by the on-off keying of a modulated audio frequency.

73. Which one of the following is characteristic of a good quality, double sideband, full carrier, 100% voice modulated, A3 emission?

 - A. One-half the total power goes into the carrier, one-half into the sidebands.
 - B. An occupied bandwidth of approximately 20 kHz.
 - C. The peak-envelope power is two times the unmodulated carrier power.
 - D. The instantaneous envelope power in the modulated signal is inversely proportional to the square of its envelope amplitude.
 - E. The power supplied by the modulation process goes entirely into the sidebands.

74. Speech can be electrically reproduced with high intelligibility through which one of the following ranges?

 - A. 50 to 500 Hz.
 - B. 5000 to 50,000 Hz.
 - C. 300 to 1000 Hz.
 - D. 100 to 3000 Hz.
 - E. 100 to 3000 Hz.

75. Although actual speech frequencies range up to 10,000 Hz with a possible bandwidth of 20,000 Hz, which one of the following best describes the justification for a 3,000 Hz bandwidth in A3 emissions?

 - A. A 3,000 Hz bandwidth requires far less power.
 - B. A bandwidth larger than 3,000 Hz cannot be transmitted.
 - C. A bandwidth larger than 3,000 Hz cannot be received.
 - D. Occupying more than the minimum bandwidth is prohibited by the Commission's Rules.
 - E. For communications purposes, a bandwidth beyond 3,000 Hz represents a waste of valuable spectrum space.

Page 6-8

76. The intelligence transmitted by an A.M. signal is conveyed by
- A. the carrier.
 - B. the carrier and the upper sideband.
 - C. the carrier and the lower sideband.
 - D. the subcarrier.
 - E. the sidebands only.
77. Which one of the following is not a typical characteristic of a good quality, narrowband, 100% voice modulated, F3 emission?
- A. An occupied bandwidth of approximately 35 kHz.
 - B. A high signal-to-noise ratio when receiving a signal of only moderate strength.
 - C. The amplitude of the signal does not change during modulation.
 - D. The modulation process takes place in a low level stage.
 - E. Non-linear amplification.
78. Which one of the following is characteristic of a parallel circuit at resonance?
- A. The impedance is at a minimum.
 - B. The inductive and capacitive reactance are equal.
 - C. The circulating current is at a minimum.
 - D. The voltage across the circuit is low.
 - E. The resonant frequency is equal to the product of the inductance and capacitance of the circuit.
79. The total resistance of the circuit shown in Figure 1 is
- A. 4 ohms.
 - B. 77 ohms.
 - C. 20 ohms.
 - D. 12 ohms.
 - E. 22.5 ohms.

Figure 1

80. Referring to the circuit shown in Figure 2, what would be the value of the capacitive reactance if the frequency were increased to 20,000 kHz?
- A. 100,000 ohms.
 - B. 50,000 ohms.
 - C. 75,000 ohms.
 - D. 25,000 ohms.
 - E. 200,000 ohms.

Page 7-B

81. The Q. of a tuned resonant circuit
A. is equal to the inductive reactance of the circuit.
B. refers to the impedance of the circuit.
C. refers to the resistance of the circuit.
D. refers to the voltage across the capacitors in the circuit.
E. determines the sharpness or selectivity of the circuit.
82. A unit which expresses the ratio of two power levels is the
A. volt.
B. ampere.
C. watt.
D. calorie.
E. decibel.
83. Which one of the following statements is not a correct principle of a transformer?
A. The degree of coupling of a transformer determines the amount of energy supplied from the primary to the secondary.
B. Transformers are capable of inducing direct current from a primary to a secondary.
C. The inductive reactance of each winding of a transformer is due to leakage flux.
D. In transformers of good design, efficiency as high as 95% can be obtained.
E. Energy is transferred from the primary winding to the secondary winding by electromagnetic induction.
84. Connecting silicon rectifiers in series for high voltage operation requires
A. all diodes in the series string to be perfectly matched.
B. equalizing resistors and capacitors in parallel with the diodes.
C. equalizing resistors in series with the diodes.
D. equalizing capacitors in series with the diodes.
E. none of the above.
85. An electrolytic capacitor
A. is an air dielectric capacitor.
B. has a variable capacitance.
C. is confined to very small values of capacitance.
D. is unsuitable as a filter capacitor.
E. must be properly connected with respect to polarity.

Page 8-8

86. One major characteristic of the grounded-grid power amplifier is that
- A. neutralization is always necessary.
 - B. it has a high input impedance.
 - C. it requires a screen grid tube.
 - D. a larger driver stage is required for an amplifier of a given output power.
 - E. the phase of the output signal is 180 degrees out of phase with the input.
87. The primary purpose of neutralization in rf amplifiers is to
- A. prevent oscillation at the operating frequency by minimizing coupling between the amplifier input and output circuits.
 - B. prevent interference to TV receivers.
 - C. help prevent VHF parasitic oscillation.
 - D. obtain a greater plate efficiency.
 - E. increase the input capacitance of the tube.
88. Which one of the following constitutes a basic principle of oscillation?
- A. A sinewave.
 - B. Neutralization.
 - C. Tickle coils.
 - D. Differentiation.
 - E. Feedback.
89. A zener diode is used primarily as
- A. a detector in radio and television receivers.
 - B. a means to reduce spurious emissions in oscillator circuits.
 - C. a rectifier element in a bridge circuit.
 - D. a speech transient clipper.
 - E. a voltage regulator.
90. For a given plate area, the largest capacitance obtainable is with
- A. a silver mica capacitor.
 - B. a paper capacitor.
 - C. an electrolytic capacitor.
 - D. a ceramic capacitor.
 - E. a variable ceramic capacitor.

Page 9-B

91. Which one of the following is characteristic of the horizontal half-wave dipole antenna?
- A. It exhibits excellent directivity when positioned less than $\frac{1}{4}$ wavelength above the ground.
 - B. It is the most common and most practical antenna for the 3.5 and 7 MHz band.
 - C. It will not operate at a harmonic of its fundamental frequency.
 - D. It works against a simulated ground plane.
 - E. It radiates equally well in all horizontal directions.
92. The approximate length of a half-wave antenna for 51 MHz is:
- A. 9.3 inches.
 - B. 5 feet.
 - C. 109 inches.
 - D. 18 inches.
 - E. 18 feet.
93. The characteristic impedance of an air-insulated, parallel-conductor transmission line is dependent primarily upon
- A. the capacitance of the line.
 - B. the inductance of the line.
 - C. the air between the conductors.
 - D. the diameter of the conductors and the spacing between them.
 - E. the insulating material separating the conductors.
94. The SWR on a transmission line is lowest when
- A. the line and antenna impedances are matched.
 - B. the transmitter output is maximum.
 - C. the antenna impedance is one-half the line impedance.
 - D. the antenna is well above and isolated from surrounding objects.
 - E. the line is a half wavelength.
95. Which one of the following is not a basic stage of a filter system SSB transmitter?
- A. Speech amplifier.
 - B. R.F. oscillator.
 - C. Mixer.
 - D. Phase shift network.
 - E. Linear amplifier.

Page 10-B

96. To help eliminate unnecessary interference to other amateur stations, tuning a transmitter should always be done with
A. an untuned antenna connected to the transmitter.
B. a signal generator and output meter.
C. an unshielded antenna connected to the transmitter.
D. a non-radiating dummy load connected to the transmitted output.
E. a well designed directive antenna connected to the transmitter.

97. An oscilloscope may be used for
A. determining the frequency ratios between two sine wave signals.
B. determining the phase difference between signals of the same frequency.
C. receiver LF alignment.
D. measurement of power output and distortion.
E. all of the above.

98. Figure 3 represents the block diagram of a transmitter used for which one of the following emissions?

- A. PS.
B. A1.
C. A3.
D. A5.
E. F3.

Figure 3

99. The input power to the plate circuit of the final amplifier in a SSB transmitter is
A. the product of the plate current averaged over several modulation envelope cycles and the dc plate voltage.
B. limited to 660 watts for a peak-to-average ratio of 2 to 1.
C. entirely independent of the characteristics of the operators voice.
D. independent of the resting value of dc plate input.
E. none of the above.

100. Which one of the following is not considered a good safety practice to help avoid the danger of electrical shock?

- A. Running power leads through conduit.
B. Housing transmitters and power supplies in metal cabinets.
C. Using a shorting stick to discharge high voltage to ground before working on a transmitter.
D. By-passing interlocks.
E. Working with a friend when servicing a transmitter.

POST AND TELEGRAPH ORDINANCE CHAPTER 132

SECTION 63

LICENCE TO ESTABLISH AN AMATEUR WIRELESS STATION

LICENCE NO.....RAD/SVS/324/1/74

TG 21-1

POST AND TELEGRAPH ORDINANCE CHAPTER 132

SECTION 63

LICENCE TO ESTABLISH AN AMATEUR WIRELESS STATION

LICENCE NO.: RAD/SVS/324/1/74

Mr. Benjamin F. Bowers.....
of Jonestown, Port Kaituma, North West District, Guyana.....
hereinafter called "the Licensee" is hereby authorised to establish a wireless sending and
receiving station (hereinafter called the station at ..Jonestown, Port Kaituma,
North West District, Guyana.....
.....

subject to the conditions overleaf and to the payment of a fee of five dollars on the grant
hereof (the receipt of which the Postmaster General hereby acknowledges) and a fee of five
dollars on the anniversary of the date hereof in each year.

This Licence valid for 3 years from the date on which it is granted is subject to
withdrawal or modification at any time, either by specific notice in writing sent to the
Licensee by Post at the address shown above, or by means of a general notice in the OFFICIAL
GZETTE addressed to all holders of amateur wireless licences. If it is desired that this
licence be renewed, application should be made to the General Manager, Guyana Telecommunication
Corporation at least 6 weeks prior to date of expiration.

Any breach of the conditions or non-payment of fees will render this licence liable
to cancellation. In event of cancellation no part of any fee paid in respect of the current
year will be returned.

Issued by the Postmaster)
General *ag*)

Date:

E. Radice
29/4/74

1. Radiotelegraph Conventions. The Licensee shall observe the provisions of the International Telecommunication Convention, Geneva 1959, and the Radio Regulations annex thereto or those of any subsequent International Convention and Regulations which may replace them so far as they are applicable to amateur stations.

2. Power and Frequencies - Messages shall be sent only on frequencies within the bands and by the types of emission specified hereunder and the total D.C. power input to the anode circuit of the valve or valves energizing the aerial shall not exceed that shown against the respective frequencies.

N.B.

Authorised maximum D.C. input power to the valve(s) feeding the aerial:

1800 MHz. to 54.0 MHz. - 60 watts
54.0 MHz. and above - 50 watts

The use of "spark" sending apparatus is specifically forbidden. Rectified alternating voltage shall not in any circumstances be employed for the I.T. supply to the

/sending apparatus.....

sending apparatus, and the H.T. supply shall be so smoothed that the value of the residual ripple voltage does not exceed 5 per cent of the D.C. voltage.

3. Frequency Control and Measurement. - When in use, the sending apparatus shall be tuned to a frequency within an authorised band, which frequency shall be so selected and maintained that no appreciable energy is radiated on any frequency outside the limits of the band with and without the modulation applied, due allowance having been made for the inaccuracy of the calibrating device. A satisfactory method of frequency stabilization shall be employed in the sending apparatus.

If the sending apparatus is not crystal controlled there shall be kept at the station, and used whenever necessary (and on all occasions when the frequency used for sending is changed), a reliable frequency meter of the piezo-electric crystal type or other type approved by the Postmaster-General, for measuring the sending frequency to an accuracy of not less than 0.1 per cent. Where the sending apparatus is crystal controlled the use of a separate crystal frequency meter as a calibrating device will not be compulsory, but a reasonably reliable frequency meter must be provided for checking that the sender is operating normally.

4. Operator. - The apparatus must in all cases be operated by or, under the direct supervision of the licensee or a person who possesses a certificate of competency issued by the Postmaster-General.

5. Sending Periods. - The station may be operated at any time, provided that no period of sending shall exceed 10 consecutive minutes. Sending shall not commence without listening on the frequency which is to be used in order to ascertain, as far as possible, whether interference is likely to be caused thereby with any other station which may be working.

6. Log. - A running record shall be kept in a book of approved type (not loose-leaf) of all sending periods showing the date and time of each period and the frequency and type of emission employed (see Condition 2). No gaps shall be left between entries in the log. The record of sending periods shall in all cases be initialised at the time of recording by the authorised operator named in Condition 4.

7. Receiver. - The station shall always be equipped for the reception of signals sent on frequencies in current use at the station at any time by means of continuous wave telegraphy, telephony and any other type of emission authorised in Condition 2.

8. (1)

Messages. - Messages may be exchanged only with amateur stations (as defined by the International Radio Regulations) in this country or abroad. Except as in this condition expressly provided messages exchanged by means of the station shall relate solely to the licensee's private (but not business) affairs or those of the person with whom he is communicating and shall be in plain language. Special gramophone records for reproducing modulations of definite tones may be used for test purposes. Gramophone records of the type intended for entertainment purposes may be used on the condition that only one such record may be used during the course of any day, the same record being repeated as desired; any record so used shall not have a playing time exceeding 10 minutes when played at the correct speed.

(2) Subject to the Regulations the use of the station for :-

- (a) advertising; or business purposes;
- (b) the sending or reception of news or the messages of persons other than the licensee or the person with whom he is communicating;

- (c) the sending or reception of broadcast programmes; or
 - (d) the sending or reception of social or political propaganda or the messages of any social or political organisation is expressly prohibited.
- (3) The licensee shall not receive any payment (either direct or indirect) for the use of the station or allow the station to be controlled by or used for the purposes of any social or political organisation.

9. Secrecy of Correspondence. - If any message which the licensee is not entitled to receive is, nevertheless, received the licensee shall not make known or allow to be made known its contents, its origin or destination, its existence or the fact of its receipt to any person (other than a duly authorized officer of Her Majesty's Government or a competent legal tribunal) and shall not reproduce in writing, copy or make use of such message or allow the same to be reproduced in writing, copied or made use of.

WA6DTJ/BR3

10. Call signal. - The call signal ~~4K.....~~ has been allotted to the station. The prefix of nationality i.e. "BR" must invariably be included in the call signal which may be sent either by Morse telegraphy at a speed not greater than 20 words per minute or telephonically if the station is authorized to use telephony.

The call signal must be sent for identification purposes at the beginning and at the end of each period of sending.

In calling another station the call signal of that station must be sent and may be repeated throughout a period of not more than one minute, after which the signal "de" must be sent once and the call signal of the calling station three times. This procedure may be repeated but the time taken in calling must not exceed three minutes without an interval during which the operator must listen in the band of frequencies in which the call has been made.

In answering a call the call signal of the calling station must be sent three times, the signal "de" once and the call signal of the answering station three times.

When telephony is used the letters of the call signals may be confirmed by the pronunciation of well-known words of which the initial letters are the same as those in the call signals, but words used in this manner must not be of a facetious character nor be capable of undesirable misinterpretation.

11. Inspection. The station shall be subject to the approval of the Postmaster-General and together with the record of transmissions and this Licence shall be open to inspection at all reasonable times by duly authorized officers of the Guyana Telecommunication Corporation who will produce their cards of identity on request.

12. Non-interference. - The station shall be used in such a manner as not to cause interference with other stations outside the authorized bands. Sending shall at once be discontinued or postponed at the request of any Government or commercial station.

When telegraphy is being used the arrangement employed for "keying" the sender must be such as to reduce to a minimum the risk of interference due to key clicks being produced in neighbouring apparatus. Whenever, for any reason, the carrier wave of the sender is being modulated by any system of modulation, care must be taken to avoid over-modulation. Particular care must be taken to avoid unwanted frequency modulation of the carrier frequency. At all times every precaution shall be taken to prevent the radiation of energy at frequencies other than those which are necessary for the type of emission in use.

13. Aerial. - If the station is situated within half a mile of the boundary of any aerodrome, the height of the aerial above the ground level shall not exceed 50 feet. An aerial which crosses above or is liable to fall upon or to be blown on to any overhead power wire (including electric lighting and tramway wires) or power apparatus must be guarded to the reasonable satisfaction of the owner of the power wire or power apparatus concerned.

14. Control in Emergency. -

- (a) If and whenever in the opinion of the Postmaster General an emergency shall have arisen in which it is expedient for the public service that Her Majesty's Government shall have control over the sending and receipt of messages by means of the station it shall be lawful for the Postmaster General to direct and cause the station to be taken possession of in the name and on behalf of Her Majesty and to prevent the licensee from using it and for these purposes or either of them to cause any part of or all the apparatus forming the station to be removed to such place as he may think fit and any person authorized by the Postmaster General may from time to time enter the premises at which the station is maintained for any such purposes as aforesaid.
- (b) The licensee shall not be entitled to any compensation in respect of the exercise by the Postmaster General of the power conferred by this condition which shall remain in force notwithstanding the withdrawal or modification of the Licence.

NOTES

- (i) Use of Supply Mains. - If power for the working of the wireless station is taken from a public electricity supply no direct connection shall be made between the supply mains and the aerial.

/(11).....

- (ii) Broadcast Reception. - This licence does not authorise the reception of broadcast programmes for entertainment purposes. For the reception of broadcast programmes for entertainment a separate broadcast receiving licence is necessary.
- (iii) Copyright. - This Licence does not authorize the licensee to do any act which is an infringement of any copyright which may exist in the matter transmitted.
- (iv) Return of Licence. - When this licence is cancelled or suspended by a new licence it must be returned to the address given at the foot of this page, together with any letters authorizing additions or alterations to the terms of the licence.
- (v) Payment of Renewal Fee. - The fee should be forwarded on the due date to the General Manager, Guyana Telecommunication Corporation, Georgetown, Guyana, quoting the Licence No. It is unnecessary to forward the licence when the renewal fee is remitted.

seeDccc

Note:

- (i) All communications should be addressed to the General Manager, Guyana Telecommunication Corporation, quoting licence number indicated above.
- (ii) Any change of address should be notified immediately. (Prior authority must be obtained before the station is established at a new address.)

Authorized maximum R.C. input power to the valve(s) feeding the aerial:

1600 Mhz. to 54.0 Mhz. - 60 watts
144 Mhz. and above - 50 watts

The use of "spark" sending apparatus is specifically forbidden. Unrectified alternating voltage shall not in any circumstances be employed for the R.T. supply to the

/sending apparatus.....

55-32-d

sending apparatus, and the R.F. supply shall be so smoothed that the value of the residual ripple voltage does not exceed 5 per cent of the D.C. voltage.

3. **Frequency Control and Measurement.** - When in use, the sending apparatus shall be tuned to a frequency within an authorised band, which frequency shall be so selected and maintained that no appreciable energy is radiated on any frequency outside the limits of the band with and without the modulation applied, due allowance having been made for the inaccuracy of the calibrating device. A satisfactory method of frequency stabilization shall be employed to the sending apparatus.

Where the sending apparatus is not crystal controlled there shall be kept at the station, and used whenever necessary (and on all occasions when the frequency used for sending is changed), a reliable frequency meter of the piezo-electric crystal type or other type approved by the Postmaster-General, for measuring the sending frequency to an accuracy of not less than 0.1 per cent. Where the sending apparatus is crystal controlled the use of a separate crystal frequency meter as a calibrating device will not be compulsory, but a reasonably reliable frequency meter must be provided for checking that the sender is operating normally.

4. **Operating.** - The apparatus must in all cases be operated by or, under the direct supervision of the licensee or a person who possesses a certificate of competency issued by the Postmaster-General.

5. **Sending Periods.** - The station may be operated at any time, provided that no period of sending shall exceed 10 consecutive minutes. Sending shall not commence without listening on the frequency which is to be used in order to ascertain, as far as possible, whether interference is likely to be caused thereby with any other station which may be working.

6. **Log.** - A running record shall be kept in a book of approved type (not loose-leaf) of all sending periods showing the date and time of each period and the frequency and type of emission employed (see Condition 2). No gaps shall be left between entries in the log. The record of sending periods shall in all cases be initialised at the time of recording by the authorized operator named in Condition 4.

7. **Receiving.** - The station shall always be equipped for the reception of signals sent on frequencies in current use at the station at any time by means of continuous wave telegraphy, telephony and any other type of emission authorised in Condition 2.

8. (1)

Messages. - Messages may be exchanged only with amateur stations (as defined by the International Radio Regulations) in this country or abroad. Except as in this condition expressly provided messages exchanged by means of the station shall relate solely to the licensee's private (but not business) affairs or those of the person with whom he is communicating and shall be in plain language. Special gramophone records for reproducing modulations of definite tones may be used for test purposes. Gramophone records of the type intended for entertainment purposes may be used on the condition that only one such record may be used during the course of any day, the same record being repeated as desired; any record so used shall not have a playing time exceeding 10 minutes when played at the correct speed.

(2) Subject to the regulations the use of the station for :-

- (a) advertising or business purposes;
- (b) the sending or reception of news or the messages of persons other than the licensee or the person with whom he is communicating;

55-32-C

- (c) the sending or reception of broadcast programmes;
- (d) the sending or reception of social or political propaganda or the messages of any social or political organisation is expressly prohibited.
- (3) The Licensee shall not receive any payment (either direct or indirect) for the use of the station or allow the station to be controlled by or used for the purposes of any social or political organisation.

8. Secrecy of Correspondence. - If any message which the Licensee is not entitled to receive is, nevertheless, received the Licensee shall not make known or allow to be made known its contents, its origin or destination, its existence or the fact of its receipt to any person (other than a duly authorized officer of Her Majesty's Government or a competent legal tribunal) and shall not reproduce in writing, copy or make use of such message or allow the same to be reproduced in writing, copied or made use of.

9. Call signal. - The call signal VAGHID/BBR has been allotted to the station. The prefix of nationality (i.e. "BBR") must invariably be included in the call signal which may be sent either by Morse telegraphy at a speed not greater than 20 words per minute or telephonically if the station is authorized to use telephony.

The call signal must be sent for identification purposes at the beginning and at the end of each period of sending.

In calling another station the call signal of that station must be sent and may be repeated throughout a period of not more than one minute, after which the signal "de" must be sent once and the call signal of the calling station three times. This procedure may be repeated but the time taken in calling must not exceed three minutes without an interval during which the operator must listen in the band of frequencies in which the call has been made.

In answering a call the call signal of the calling station must be sent three times, the signal "de" once and the call signal of the answering station three times.

When telephony is used the letters of the call signals may be confirmed by the pronunciation of well-known words of which the initial letters are the same as those in the call signals, but words used in this manner must not be of a facetious character nor be capable of undesirable misinterpretation.

10. Inspection. The station shall be subject to the approval of the Postmaster-General and together with the record of transmission and this Licence shall be open to inspection at all reasonable times by duly authorized officers of the Guyana Telecommunication Corporation who will produce their cards of identity on request.

RE.....
J5-82-f

12. Non-interference. - The station shall be used in such a manner as not to cause interference with other stations outside the authorized bands. Sending shall at once be discontinued or postponed at the request of any Government or commercial station.

When telegraphy is being used the arrangement employed for "keying" the sender must be such as to reduce to a minimum the risk of interference due to key clicks being produced in neighbouring apparatus. Whenever, for any reason, the carrier wave of the sender is being modulated by any system of modulation, care must be taken to avoid over-modulation. Particular care must be taken to avoid unwanted frequency modulation of the carrier frequency. At all times every precaution shall be taken to prevent the radiation of energy at frequencies other than those which are necessary for the type of emission in use.

13. Aerial. - If the station is situated within half a mile of the boundary of any aerodrome, the height of the aerial above the ground level shall not exceed 50 feet. An aerial which crosses above or is liable to fall upon or to be blown on to any overhead power wire (including electric lighting and tramway wires) or power apparatus must be guarded to the reasonable satisfaction of the owner of the power wire or power apparatus concerned.

14. Control in Emergency. -

- (a) If and whenever in the opinion of the Postmaster General an emergency shall have arisen in which it is expedient for the public service that Her Majesty's Government shall have control over the sending and receipt of messages by means of the station it shall be lawful for the Postmaster General to direct and cause the station to be taken possession of in the name and on behalf of Her Majesty and to prevent the Licensee from using it and for these purposes or either of them to cause any part of or all the apparatus forming the station to be removed to such place as he may think fit and any person authorized by the Postmaster General may from time to time enter the premises at which the station is maintained for any such purposes as aforesaid.
- (b) The Licensee shall not be entitled to any compensation in respect of the exercise by the Postmaster General of the power conferred by this condition which shall remain in force notwithstanding the withdrawal or modification of the Licence.

NOTES.

- (1) Law of Supply Mains. - If power for the working of the wireless station is taken from a public electricity supply no direct connection shall be made between the supply mains and the aerial.

/15.....

JJ-32-9

- (ii) Broadcast Reception. - This Licence does not authorize the reception of broadcast programmes for entertainment purposes. For the reception of broadcast programmes for entertainment a separate broadcast receiving licence is necessary.
- (iii) Copyright. - This Licence does not authorize the Licensee to do any act which is an infringement of any copyright which may exist in the matter transmitted.
- (iv) Return of Licence. - When this Licence is cancelled or suspended by a new Licence it must be returned to the address given at the foot of this page, together with any letters authorizing additions or alterations to the terms of the Licence.
- (v) Payment of Renewal Fees. - The fee should be forwarded on the due date to the General Manager, Guyana Telecommunication Corporation, Georgetown, Guyana, quoting the Licence No. It is unnecessary to forward the Licence when the renewal fee is remitted.

seeBox

Notes:

- (i) All communications should be addressed to the General Manager, Guyana Telecommunication Corporation, quoting licence number indicated above.
- (ii) Any change of address should be notified immediately. (Prior authority must be obtained before the station is established at a new address.)

55-35

21 August, 1977

Dear Minister:

I just wanted to let you know our radio operators out here in the jungle at Jonestown have been doing some good will/public relations for Guyana when we have contact with other "hams" around the world. We must have had over 1,000 contacts during our radio work for the Peoples Temple Agricultural Project (I'm sending you a list of the radio numbers of people we've talked to in just one day -- and you could, if you wanted to, identify them in a QSL book -- we expect to have ours in the near future.)

I wrote a while back to the Chairman of the Federal Communications Commission in the States, telling him the good word about Guyana and the work we're cooperating on here in the jungle heartland. I've also written to a number of the radio hams who've had QSL's with us -- that is, a radio exchange. My letters are full of good things about Guyana and the project, and I'm getting some enthusiastic response.

It's gratifying to find so much interest in what's going on here. Often times we have contact with people who have never even heard of Guyana, or who thought of it as either British or French Guyana, as though it could be either. (A strange omission in their geography training.) Others ask if this isn't a socialist country and we say it is and then we tell how free everyone is and how much the government is helping people and assisting us, for example in getting us information about seeds and plantings or where we can find needed supplies. We said how helpful, too, the country has been for our youngsters who are getting the chance to return to nature and work the soil.

We just talk in a casual way and don't do any propagandizing. They get interested when we talk about so many coming to work here and how much we love this country. We let anyone break in and then we begin to tell them about this beautiful place. We say not one person who's come here has any negative feeling about this country. Naturally, we never say anything negative about the U.S. or the press there (though we have reason to) and we never refer to anything here in anything less than a positive, enthusiastic way. We talk about the lovely climate, the beautiful crops and above all the warmth and friendliness of the Guyanese people.

One station in the States stays on for hours wanting to talk and help with contacts with our California headquarters when the airwaves are blocked between here and there. He's such a helpful chap -- and he says he's very much interested in Guyana.

Bishop Jones is a good one for making lots of contacts. He ends up talking to people almost every day in both government and other churches. It's common for ministers to have radios, so he talks to people of every denomination and tells them how much we think of Guyana. One minister reported back that he had discussed Guyana in his Sunday service, he was so impressed with what he heard. People have been enthusiastic about our plans for a medical clinic, and they're turned on when we tell about catching a bush cow.

Figuring that we've had well over a thousand contacts and then some of those people are passing the word on to others, I guess we are reaching a lot of people with the good word about Guyana. Since I've been telling others about all this, I thought I'd tell you, too. We're making fine progress out here in the North West District, and we're more and more glad to be here. Hope you visit us soon.

Cooperatively yours,
Al Touchette

THE POLITICS OF SPIRE

By Robert Shrum

In the U. S. Congress, June was the cruellest month, as a spirit of revenge against the past swept through the House and Senate. The votes on Vietnam were typical. In the Senate, only two members, Bill Hathaway of Maine and George McGovern, opposed a ban on negotiating possible reconstruction aid. And both houses approved a requirement that the United States subtract from its international bank contributions a sum equal to any development loans those banks grant to Vietnam, Laos, or Cambodia.

Congress also took out its Vietnam revenge on draft resisters and broken servicemen, denying the Administration the funds necessary to complete the Carter amnesty program, as well as withholding future veterans' benefits from 175,000 men, whose less than honorable discharges could be upgraded under another Carter proposal. Many of the men affected fought in the front lines of the war; some had two tours of duty in Indochina and many received the purple heart. Often they were discharged because of the drug habits they had picked up in the battle zones. Others were victims of trumped up charges for expressing unpopular political opinions, e.g., questioning the war itself.

If we are to pick the bones of the past, then the House and Senate might more justly block the lavish congressional pensions of all members who less than honorably discharged their own constitutional duties during the Vietnam period, when the only flak they had to fear was political. Instead, they are acting as though punishing the resisters and victims of the war somehow will prove that it was a worthy business after all.

Thus Senator Dole, once Nixon's loudest mouthpiece for the war, recently spoke vigorously against international bank loans to replace the schools, roads, villages, and irrigation systems that American B-52s bombarded away in the process of destroying Vietnam in order to save it. Dole, who should never mention the word Vietnam outside a confessional, argued that "having left enough blood (there), let's don't start sending cash to follow the blood." The senator might prefer to forget who voted for the bloodletting. He would surely prefer that the rest of us forget.

The twisted reaction of Dole and others to the Vietnam fiasco is pathetic, but the reactionaries retain great power all the same in the psychic aftershock of a lost war, their spite and their fear today dominating congressional foreign policymaking. The Senate has overwhelmingly resolved, for instance, that the Castro government in Cuba should not be recognized, even though it has survived 16 years of U. S. hostility and assassination plots. The Congress also has ruled out all foreign aid to the Marxist regimes in Mozambique and Angola, whose cooperation is critical to any Rhodesian settlement. As read on Capitol Hill, the lesson of Vietnam seems to be that we should relive it. By repeating in Africa its knee-jerk anticommunism, Congress is acting as if the reflex had been vindicated in Southeast Asia.

That same reflex could also trip the country into another Vietnam (or for that matter, another Korea) in South Korea. During its splurge of June jingoism, the Senate, led by Minority Leader Howard Baker, turned aside a proposed endorsement of President Carter's troop withdrawal from that country.

Majority Leader Robert Byrd can be just as hard-line as his Republican counterpart. At a June 8 White House breakfast, he warned the President that Senate ratification of a Panama Canal treaty would be very, very tough. Byrd himself had doubts about giving away too many American "rights" in the Canal Zone. Afterward, a Carter adviser commented acidly, "The alternative to a treaty is a war. Maybe the rhetorical generals in

JJ-37-C

*Congress should fight this one themselves."

Byrd also pointed with alarm to a Soviet weapons build-up, and he is hardly alone. With Aggressive insecurity fed by defeat in Vietnam, the Congress is rushing into a new arms race. The House has approved the neutron bomb, the ultimate weapon of a dehumanized capitalism; it will kill people but leave the real property standing. Assuming presently scheduled developments in U. S. missile warheads and guidance systems by the early 1980's, an American attack could knock out 80 percent of the Soviet Union's land-based strategic forces. That threat in turn could understandably pressure the Russians to strike first in a crisis. Racing to be over-safe in Nuclear forces could mean being very sorry.

Henry Kissinger repeatedly predicted a right-wing reaction to defeat in Vietnam. But in fact the representatives from across the ideological spectrum, Moderate Republican Lowell Weicker, hero of the Watergate Committee, went straight down the jingoistic line this June. Loquacious liberal Frank Church, who wore his antiwar credentials proudly through his '76 presidential campaign, voted against the international bank loans to Vietnam. Delaware's Joe Biden, who as a peace candidate became the youngest senator at 30, quietly cast his vote against funding the Carter amnesty program. Biden himself escaped being drafted during the Vietnam years because he became a husband and father before his law school deferment expired in 1968. (only 25 sons of congressmen fought in Indochina. The single member of Congress who is a Vietnam ground-combat veteran, Pennsylvania Representative John Murtha, not only voted, but pleaded on the House floor for the amnesty funding.)

Viewing what had been wrought by liberals, moderates and conservatives alike, George McGovern told the Senate that, although he had just returned from a weekend trip with his three grandsons to Disneyworld, he had the eerie feeling he was still there. "The Mad Hatter," he said, seemed to be running Congress. But irrational policy now makes sensible politics, at least in the conventional view from Capitol Hill. Winding up the arguments against amnesty during the Senate debate, South Carolina's Fritz Hollings proudly announced: "We are prepared to vote both as a matter of conscience and constituency."

The former is really the afterthought to the latter in many legislative minus. The congressional reactionaries are not just those entangled in their Vietnam guilts and cold war fears. Others in the Senate and the House who opposed the Vietnam disaster now are feeling--and following--the public backlash.

The long-haired protesters of the 1960s and early '70s challenged more than the Indochina policy of two presidents, most politicians and their own parents. It was not a long leap of consciousness from protesting the defoliation of Asian forests to demonstrating against the pollution of the American environment, from civil rights to women's rights to gay rights. Now the postwar, post-sixties backlash is slushing along the same wider arc. The nation is retreating defensively to a politics of spite against all the dissent, demands and new lifestyles of the past decade.

Americans increasingly resist sacrifices for racial equality, so the House has vetoed funds for affirmative action in education and employment, and both branches have slashed the appropriations for integrating schools. Under the pressure from the anti-abortion lobby, an unrepresentative House of 417 men and 18 women has decided that poor women can no longer collect Medicaid for abortions. Many of the same legislators, notes Illinois Representative Marcy Russo, "who staunchly defend these youngsters' right to life will shortly turn around and vote against social welfare programs" to improve the quality of their lives once they are born. The backlash of '77 has even hit the environmental movement, the one cause that seemed to be almost politically akin to motherhood. In May, the House voted to postpone and downgrade the auto emission standards.

55-37-5

Gay rights is perhaps the clearest example of the connection between the public backlash and the congressional reaction. After Jade County confined its laws to a literal interpretation of the Old Testament (I wonder if Anita Bryant eats pork), the Congress rushed to join in. The new housing bill will overturn the recent legislation permitting homosexual couples to live in public housing. And recently the House voted through a proposal by Representative Larry McDonald, a John Birch society member, prohibiting federal legal aid to contest violations of "so-called gay rights."

Across the board, Congress has reinforced, not tempered, the reactionary spirit, which so many of its members instinctively share. More and more of them seem to be political clones of Ted Baxter: good faces, good hairstyles, good modulation-and small minds.

If much of the nation would like to return to a simpler day when grass meant lawn, gay meant cheerful and the U.S. won all its wars-well, the present Congress can hardly be counted on to hinder the general retreat.

Co-operative Republic of Guyana
SOUTH AMERICA

Name John Ram

Class/Form 1

Subject English

Date NOV 10-7

JJ-38-

JJ-37-C

O. Be ~~Puddy~~ ^{Bob} very busy from time of leave
Plus find out what he has been doing especially
What his day was like. Been a great help

M. MacDonald daughter used to be a member of the
MacDonald family. Before the MacDonald family
has some independent signs.

1. Ends

J. Tell ~~Bog~~ ^{Bog} we Ramania to
come Sunday or Monday to be here
during the same time.

J. Cynthia - concentrated, funded
conspiracy. Obviously not Give a long
J. Evaluation of would have wanted
when others could come like Sal

J. No on Mel

J. nothing new for Dace. Just encourage
J. him to come home

J. Tell Jenny we heard from a friend
of Theodore that it was very much
alive. And tell Sal to go ahead.

5-85-77

55-38-b

55-37-c

~~Pls enclose~~, about nuclear consistency.
is all I can do on
the golden day, all before

No day I need between
and save for the need
up to good things
book is what you do;
hot

success to and as
to take a break between
where I am and
where hot I have up
most for you to go
you want me

+ strategy

Judy found out about and was visit
from 881 because McKeith called told them
why I phone's parked; Sal's home
her either she's sick to be asked
about anything at the time + there
was no contact with Seattle or
there was also no contact w/ FBI
in case of power failure. To whom
Sob of this.

+ About after those messages from people
say they got from Wes, Mac etc.
Robert carefully questioned + they
are lying about all of them.

Buddy should send a post card to his
dad + ask him to mail it for him -
should be done - saying he's
travelling off for a while +
will prepare a definite card

9-8E-T7

JJ-38-d

JJ-38-C

JJ-37-C

tell Sal that Keith would like to see her 2 + maybe she could go with Apten on the capitol + also spend a couple of days with WRB3 after he leaves, too rest etc.

- even young person from Adam coming for New interview (The one who has been 2 chff's.)
Have Sue 2 show slides
- let us know how he is + maybe he could visit sometime when these other clowns aren't here
- need first three weeks

It's gonna be real
in this way, Ted's very busy
TSPN
TSPN

AB-32-CT

JJ-38-e

He is probably unavailable
+ Ted Charlie to proceed early and
Ledy did not dictate letter - he
just called H. Moon office + told
conditions about other letters
H. Moon worded it.

What date is planned for the
second trip?

Early in May - two days
best time would be in
the middle of May
- who about fourth that call was made
since I ask what Betty recently
going to have bad trouble
discovered that Keith yours
+ would be hard to excuse travel
target probably not far startle
or surprise because Keith is still in the
last radio project if a bridge
his school was canceled other place on his
way up to the 12th floor city and
forget the problems at 1 C.R.

JJ-38-i

still get off, but did not
she says to go ahead with
the call.

~~✓~~ I just the one the
nurse said I said
big thing. Just hate to work
call as intercept

OK basically we are
back where we were this
morning, a ~~tree of sit~~
~~version~~ it is an
either ~~for or against~~
or situation no room for
the other guy. or when
we bring we brought
in the health factor, he
sd mrs. kinderell old mate
the decision basically goes
there will be one man,
~~since~~ one person making
these kinds of decisions
and it cannot wait till
after the trial it has

JJ-38-j

JJ-37-c

start with the letter
and it has to be before
the trip, and we suppose
that means the other
guy is to stay out of
the picture after that
book.

That's it.

Just some others from
one seat to decide before
the trip, not two more seats
either, or k.

→ go back and say

Allida said she's given her word and
Sal has already changed all
the plans. Come here so we
can discuss whether or not
Apton gets into the clinic. There
are different views in the Gabriels.
Their own profile characterizes
Apton as right wing.

Keith knows you don't break yr

55-38-K

word & you can't expect us to break
ours when it was based on yr original
recommendation. Come here & we can
talk about Sal's future role.

KC

→ get ready for gabrels

make a

→ → → Tom pse. ask Jerome
to call Martin's Dad and tell
him that [redacted] has a few weeks
off and is traveling around [redacted].
[redacted] wanted me to tell him
not to worry about him, he will keep in
touch.

→ get ready for that

Martin go

→ → → pse tell Bogita Hello
for me, I will have a msg later
for her. ready for bogita

→ → → 2nd will

→ → → since ei?

Martin called. recall'd his dad
from San Diego and school [redacted]
teacher told him in [redacted]

55-37-C

On his way to drawre
+ also there was a strange
call last night for him. It'd be some one asked
his dad to find out exactly
where he is right now.

Says says Emmett

Verse 1b (Continued)

or calling either one will
info instructors w/d ~~the last~~

55-38-8

file but if circumstances
will be ~~strange~~ up
for ranging. ~~from~~ the b
from ~~close~~ the close
for ranging. & as we
did we feel Perez
will respond to necky because
of their long time ~~success~~ ~~left~~
on ship ~~etc~~
back on the day when
discussions in favor of Perez
from buying homes in
S.F. Beckly bought a home
for Perez and kept ~~etc~~ for
him until it could be transferred
to Perez - he now d his
child after Beckly.
Perez raised his child
after Beckly. Beckly will
bad mouthed workers and
give him a lot of negative
stuff that Perez probably
has never heard before.
55-38-8

~~we feel it will~~

we feel it will credit
the metedous division and
that prez will in large
degree be sympathetic
because of ~~the~~

~~she~~ in large degree
be sympathetic to her
becky because of ~~the~~ division
she ~~she is just that~~

What is the
central problem here
is that this one has
a direct bearing on
becky & becky's field
of responsibility, i.e.
essie, toward sally o'neill don
and mother would be
bearing the same, i.e.
~~that becky doesn't care~~
It will be all right
as to her ~~it's~~

JJ-38-S

Washington
claim. becky will make
her effusively kind grand
moore here &itching for
becky just want to be

JJ-38-X

so Mrs Lee arranged for someone to
be ~~there~~ ^{there} tonite to see that
Bill + friends get off safely? ~~there~~
~~there~~ Don't get involved in
the party, we fear it'd not even
let the guests know. Just phone
me about it.

Relations between
Grace and son ~~are~~ ^{is} tonite
so ten is going to b
her ^{will} going
in his usual Party attire
ie Fritchard
she has coming here
this afternoon, noon +
and he's bus.

The idea was to have Fritchard
talk to Lawrence before this
afternoon ~~so~~ so Lawrence
no come this afternoon.

By the way, they will do
anything that's fritchard.
will ask us why interview was
not going. Any idea what to
say? ~~there~~

BECAUSE HE IS GIVING AN ESTATE OR
SITUATION. HE WAS ASKED TO COME SO
LUCAS AND HIS FEARS OF RESPONSIBILITY
CAME DL LARKEE OUT/T HE COULD ALL
COOPERATE FOR THE BENEFIT OF THE
PATIENT, BUT HE IS RUINING THE PATIENT
INTERVIEW & REFUSING TO COME UNLESS
LUCAS IS TOTALLY OUT OF THE PICTURE.
RIGHT NOW, THE PATIENT NEEDS ALL THE
HELP HE CAN GET. STRESS HOW HELLER
LOUIS LAWRENCE ARE ~~NO~~ ^{NO} TO ~~there~~
NOT HER WITH PATIENT SOON SHE IS SO
SICK IS NOT FAIR. LAWRENCE'S LEAVING
MAYBE WELL BE THE FINAL BLOW PATIENT
WE STRESS HOW I NEED AN
SOSICK ⁴

JJ-30-28

JJ-30-a-a

JJ-37-C

The only problem with
that is Lawrence.
he sd he wd go over there
in an emergency, so Lawrence
will buy the B's long time
quoted

No because if y recall we
do pass the message to have
them come & we + wws could
work things out by ourselves
absent if necessary + his resources
are limited, etc. I remember
most that 2 days ago.

Another fact
is not following Lawrence
dubay e. w. not another
thing will they tell
the other guy and
be already done
this are as stupid + sibetly
with over orientation
not bother about that

JS-38-c-12
~~JS-38-c-12~~

JS-38-c

JS-37-c

at just found out we can
get George out earlier.
It's flight wise it is
possible to get George out
the same day so he will arrive
the same day as Jill. Does
do u only want him for when
Lucas gets there? he can't
be gone long.

By the way did Jerome ever
pick up Donnas check? Did he
get the telegram.

fwd
neg - no telegram, Jerome
sent a present to her. There
are some things Donna
has to do first. Identification
was not issue; Donna just
has to take care of
some things before any
thing can be done

JS-30-dd

on sheet:

y ready?

① TELL LUCAS TO GO AHEAD WITH A STATEMENT
THAT HE SEEKS FOR M CHARLES JACKSON.
② ALSO ORKEY TO HIM THAT WHEN HE
IS IN THE CAPITAL, HE CAN GET STATEMENTS
FROM ~~Jeanette & Deb~~ Jeanette & Deb
to go hand with
my statements. Own statement
wr.

BSL likes how long he
can stay. We will like him
to come to the office
for a few days. mid/8/63 Jackson

Mr. Orkey Oracle phone that y
communicate to Lucas that
he can see he seeks for
Charles Jackson. Ok before
give napiece C's

JS-30-ecrd

Can we possibly
leave tomorrow and arrive
tomorrow in the afternoon
we'll have to plan in the morning
we'll have to drop 3 hours
Cafe to 9 am - Friday and Monday
IKA next weekend have to
try to hire some fermato
free table first place for
about 2500\$ - if the car
(if all goes well) he will
believe him he will
try to get away to now
DAN

Even
if we get those hours
don't know, it all
depends on time or not
Jean is calling him now
she'll ask again

55-30-ff 60

Lucas - won't be on the
I don't think so, looks
like the same one.
It would be starting
right now, if every body
is on time - noon. Jeff was nice
all of Mr. CATNUTT'S
people are here, the other
young man from exam is here yet
Olin, Belle, and Leonette
are showing slides,
morning first, then afternoon
etc. Dr. Wootpert is
there - slides and giving
presentation
and Lawrence just arrived
with the young man from
exam. Looks like Lawrence
and says he will be here
at the same time. very very
he is. He'll busy with those
patients.

55-30-ff ~~60~~

- we are anticipating
that ~~b~~ Decker will be
hurt if he has come the
with out means.
and we don't invite him
to moxie any ideas?
we are holding
it were need a man right
away. re-advised
No radio. Contact
Loose
play cont let me in a sail
that
the tell Decker

story! Hitler had received
a statement from PT that he
~~had~~ ~~stated~~ that he
in any part, ~~can't~~
So in part, it will
be impossible for LR and
his company of people
to deaccommodate ~~at all~~
at this time. We have
received word he is bring
in gawhale group there to
stay at ~~a~~ in ~~idiot~~, provoking
and inciting we know from
his own mouth his intentions
are negative.

LR's office broken
able to contact Mr. and
CG, but not ~~but~~ rather.
j. If they set up objectives
that can't be met with
out any discussion, this conclusion
has got to be obviously false.
+ they are going to

JJ-38-22

Show COOPERATION with an
honest effort to obtain informed
and that indicates they have
some thing to hide. Far still
making the assumption we can't
~~black~~ we can work it out.
The cong. and his staff etc
LR delegation will have to
rely heavily on the cooperation
of the guyana government and
ultimately of j and pt. the
ref. and his staff have been
there visit will be an
~~very~~ occasion for pt to
giving the ~~theirs~~ and concerns
of some relatives of members
there &
through c.g. the pt
has stated that certain
sectors of the news media
and some reporters are
considered enemies of pt because

JJ-38 and

JJ-37-c

of reports based on the accounts of former members alleging corporal punishment and poor living conditions at facilities in both Guy and US.

ac g. has maintained that even the pt's most serious detractors will be impressed if they had the opportunity to see the project first hand and to talk to members told but there still are questions abt whether reporters on this trip will be admitted to the mission.

"apt, which has claimed ~~200~~ ret 20000 members the bases in Laramie, if, and number of other locals in Calif. ~~the secy.~~
JJ ~~as head of the~~
JJ-38-ccc

SFLB a. in the summer of 1977 and reports by has reigned in guy. since the n.

X theres one or two of interest cas.

let Entry 2 just sd
that ~~now~~ ^{then} Hellis was too ~~the~~ ^{the} Blaine sd his original intention was to talk to people at ~~the~~ ^{any} place etc. and what he thought he was able to do that at any time. It was ~~cas~~ ^{cas} it was Curtis usual. Sleant also Lucas will be there - Thursday. not possible before that. Thurs for sure.

JJ-38-ccc ~~ccc~~

JJ-37-c

Jerry ~~had~~ ^{is} back to town
nite, Jerry brought up
mels symptoms. She ~~said~~ that
she ~~give~~ had taken Nathan.
~~a file~~ of the record
on the ~~record~~ ^{he} said Mr. Clarke
was like nothing and that
Mark was the ~~father~~ father of
Jerry. ~~an~~

Schultz was very
upset. Impatient to find him
to be a very pleasant person
u might talk to him &
and see ~~if~~ see what
u think. When he comes in
other ~~also~~ ^{the} he may
be responsible for going away
~~or~~ the ~~—~~ may or of he
really is there way
little chance to talk but
he may have potential

erber, in abt an hour and
a half.

Curtis

Mr. Holtz

to [redacted]

CLS have guests at this
time - I will to have
guests - Charles GARRY et al
from Jean & Cecilia
GARRY was so hot spoken
with much dereliction
Curtis last nite and to
day reittates disregard
for her and for not checking
with ~~the~~ one bone one
like - ~~right~~ she
will be very hard hit
when ~~she~~ learns abt
~~Mrs. Garry~~ O'neil, esp: when
Curtis brings it to her
attention. Some thing must
be sd. to her.

JJ-38-fff

CLS was evicting pt lawyers
Nec
Santic says he plans on staying till the 19th or until
he gets thru
→ ~~same~~ because 1st reason
he had not put on the
positive take he had Dated
Date of from was he thought
was ~~an~~ enlarging visit
for fin and he did run it
all in a single documentary

~~Shirley called back~~
and she didn't want trespass
on ~~at~~ go, we would have to
have it in ~~an~~ by 300,
which is 45 min. from now
neg neg horde
is not coming in

JJ-38-999

JJ-37-C

GIVE THEM LUCAS STATEMENT
AND ALSO ANY STATEMENT
~~OR THIS AND OTHER COMMUNISTS~~
~~WE DON'T WANT THEM~~

GIVE THE STATEMENT AND
OTHER COMMUNIST LETTERS FROM
ALL PARTS OF THE WORLD / ONE
~~RECENTLY~~ RECENT SEVERAL
DAYS WITH US - WE HAVE HAD
OFFICIAL FROM STYL FILMMAKERS -
~~WE JUST TALKED TO THEM~~
HOWEVER WE DON'T WANT TO BE
PART OF A MEDIA CIRCUS... WE
DO NOT WANT A DISCUSSION THAT
INCLUDES PERSONS OTHER THAN
W/ THOSE WHO WE CONCERN...

8

JJ-38-666 ~~SEE~~

- Steve has mentioned to...
know right now b/w
Hilda + ~~to~~ will talk
to him on our behalf since
he already asked him.
We want ~~to~~ know
if it's Hilda or Ramona
that is really speaking.
Now you he heard there
were some problems between
the two still Hilda go
ahead and talk?
- so we can't tell
Hilda say the same thing she
did yesterday - as right
now
Hilda can go ahead, but soon
we will come to. And please
ask ~~Hilda~~ not to Hilda not to give
our differences on camera + please
show unity bet. her + Ramona, since
Ramona is acting on our behalf in
some areas. JJ-38-iii ~~SEE~~

JJ-38-c

i just called hilda, and
steve was there with steve
helden had ~~not~~ already
given statement, and it has
gone to the ~~tribune~~ & gone
to bassett toolkit. so
i did any nothing as it is
already gone. i asked
her what her statement
had been & and she sd
it was basically last nites
statement, with variations, one
did not want to talk abt
it in front of steve. &
that's it.

...mean between
~~lucy~~ & mean between her
and lucas? - dont know,
it seems like he would

earlier when steve called,
he sd

el we don't know
if hilda was the source,
but when steve called
earlier this afternoon,
he wanted to know who
wred spoke to him on
jane's behalf, sd he under
stood that there was
some prblm between the
~~lucy~~

steve either got it
from hilda or someone else
maybe josephine.

...well ~~SD~~
FBI in
wash. contacted by the
chron. also sd they will
begin investigation the
next

250 th. or the
JJ-38-KKK

JJ-38-jjj

JJ-37-C

~~M~~ or you're some more
~~said~~ ~~as~~ this is from Jean.
LAST NITE Perez met me
in late news. Seeing
patients and interview had
begun already - when he arrived
an hour late, we were
unable to talk to him.
him ~~about~~ the background
with gretce seen before he
talked to emrett.

Now it is a whole
different relationship between
gretchen, Perez, and Clarke
than it was yesterday,
because all have talked
to emrett. ~~so~~ now
it is careers and images
as well as personal issues
of the balance. all went
well enough last night,
but that may be it all the
more import ~~at~~ that ~~it~~

JJ-38-262

Clarke be direct with
gretchen, and back her
up. Why is it not possible
to ask ~~him~~ ask for her to
come to delaware at some
point and help? It seems
from this perspective the
only recourse.

~~the suggestion~~
~~nowhere~~
~~the~~

~~the~~
~~this is to add to a~~
~~old~~

~~he~~ because last ~~way~~
how can ~~synder~~ be ask
over gretchen? ~~synder~~ will
do it, and gretchen will be
very upset. ~~to~~ Josephine
also appears to be comp
neters by talking to synd
on gretchen's behalf over
and about that ~~JJ-38-262~~ ~~hyde~~ ~~w~~

JJ-37-C

be subject to some self-flight
(Schedule that Lucas ~~will~~
~~not~~ ^{go} ~~will~~ not get there
before Lucas)

S. There is no intention for
Snyder to come to us. I don't know
how you got that.

Again, we are not going to give
up Lucas, ~~and that will be~~ ^{our} position
and that seems to
be what Hilda insists on.

[scribble] I go up
any ^{way} ~~any~~ ^{way} I
first is ^{the} ~~the~~ ^{the} ~~the~~ what
Hilda is ^{the} ~~the~~ ^{the} ~~the~~ ^{the} ~~the~~
make Jean work
to some guilty ~~nothing~~
Jean wants to point
out that Hilda did
not say she will not ~~work~~
work with Lucas; she

JJ-38 man

J. Lucas did not know
what he was doing in these
matters, if she worked
with Hilda he would
have to do every thing under
fun through her, and will have
to start with Clarke renew
the letter ~~she~~ ^{not} bring will
be done with out her approval
without her ^{final} approval
That is unacceptable to us.

Taylor here. Delton send
me my flour mail, also called
#5FL, ASAP.

rpt no. like I didn't
make any reverse out of ~~the~~ ^{the}
B my ^{reg} just
that it is ^{reg} unacceptable

JJ-38-000

JJ-37-C

(Sandy wants to know
a) there any more records
for medical Mrs. Jenkins
B) going out on Friday
and won't know what makes
that

C) Don't send any of Patti
stuff ea

Ask Hilda to come in
re Mr. Ray that stated
that was unaccustomed
to take it. He will bring
about the other things
Leave this we think these
are o.s. or

Even would
shift better if he
left here. One day after
Lucas, got shade fine

JJ-38-ppp

Mr. Bob Lackey
t them to court at the
fire rd. V.L.U.

is by the
He was trying to make a deal get us

at street after Roth
smack not nasty
not nasty, ~~smack~~ OS there
at Jack's

→ This is basic. Perhaps you can call P.
~~the~~ and say he was the one guy
was wanted + we're going to get him
arrested now. Find out what
happened + say we will work on
straightening it out, so he can come
to JT.

Ask Hilda if she'd
make Thurs. Nite
first three goodys

JJ-38-888

JJ-37-C

by way info., there was
an article in the Chron last
nite) by rsi. e.

If u mean, Jeanette
tomorrow at 11 AM two know
Laf. abt 13.
not really, it seemed
to symp. with C.R.

in fact
last firs 2nd be
by - do w. my b?

Lawrence spoke to
shirley late last night. said
she's been no. steps -
several times and what
people sd that deer was
not true. She is
very free and open and
any of her children
were welcome to visit
mr. morrow if they
wanted.

55-38-rrr

I'd learn rd read the statement
given yesterday to Mrs. somer,.
but she did not say word
abt

Mrs. Fogarty took
as all for R.L.
& bin h neg

ETM was just talking
to mrs. Golden is a
I can just talk to
mrs. Golden, and asked
her, bldn is with mrs.

~~ETM is with mrs. Golden~~
~~ETM is with mrs. Golden~~
with mrs. Golden
