Specimens received December 4, 1978

Q40-Q41 Two metal fragments

**Result of examination:**

Specimen Q40 is a metal fragment which bears no observable bullet characteristics or microscopic marks of value for comparison with a suspect weapon.

Specimen Q41 is a bullet jacket fragment which is too minute to determine caliber or manufacturer. The partial rifling impressions remaining in Q41 would tend to indicate that Q41 was fired from the barrel of a weapon with right twist rifling. The microscopic marks remaining in Q41 are not sufficient for identification purposes.

Specimens Q40 and Q41 are being returned to the San Juan Division under separate cover by registered mail.

## FEDERAL BUREAU OF INVESTIGATION

11/10/78 1048 [REDACTED] Description 12/19/78

[REDACTED] home telephone [REDACTED] was contacted at his place of business, [REDACTED] telephone number [REDACTED], and after being advised of the identity of SA [REDACTED] was advised that he was being contacted in response to the telephone call which he, [REDACTED], had made to the Fort Worth Resident Agency of the FBI on December 15, 1978, offering a tape recording of radio transmissions between Jonestown, Guyana and San Francisco. (u)

At this time [REDACTED] made available a Capitol C60 cassette tape with recorded information of radio transmissions on one side. (u)

[REDACTED] advised that from reviewing his logs, he believes this recording was made during the first couple of weeks of August, 1978, however, he advised he cannot at this time be more specific about the date. He advised that it was approximately 11:00 p.m. or 12:00 midnight when he heard the transmissions coming over the air and thought it was conversations between medical missionaries and used a Lloyd's cassette recorder and microphone to record the conversation between two women operators. (u)

[REDACTED] advised he has a Tentec Triton Four receiver with a Cushgraph ATB34 antenna and operates under ham radio license [REDACTED] and the station is located at his residence. [REDACTED] advised that prior to starting the recorder, one of the operators mentioned that they were transmitting from Jonestown and were going to Georgetown and would return to Jonestown the following day. (u)

He advised that in listening to the radio transmissions, he felt the radio procedures were correct, however, the conversations did not make sense, and after recording the conversations he had played it for a friend who had indicated that he thought the messages were possibly coded. He advised that he looked up the call letters being used by the two operators and determined that they were assigned to male operators, however the stations were in fact, being used by female operators. ENCLOSURE

██████ advised that when he keyed his microphone in an attempt to talk to the operators, he distorted the tape to some degree, however, did in fact establish contact with the other operators and was advised by them that the conversations were of a medical missionary type. (u)

██████ advised that from checking his 79 edition of the United States Call Book - Radio Amateur Call Book publication, he determined that call letters WV6MID is registered to ALBERT A. TOUCHETTE, 3747 RD-B, Redwood, California, WD6DVI registered to ELTON T. ADAMS, 998 Divisadess, Box 15023, San Francisco, California, and WD6DDI was listed to GEORGE A. DAVIS at 16210 Redwood Street, Fountain Valley, California. (u)

██████ made available the original cassette recording and requested that he be furnished with a copy of the material appearing on the tape whenever possible. (u)
