

~~TOP SECRET~~

as [66-1318] X u

Mail coverage and a check of toll calls at the MARTIN DEUTSCH residence for a period of six months prior to the initiation of the surveillance failed to develop any information pertinent to the instant inquiry. (S) u

The Albuquerque Division located a record of DEUTSCH's tenure at Los Alamos, a review of which reflects that he left Boston for Los Alamos on January 20, 1944, and was stationed there until January 19, 1946. He was not absent from Los Alamos during the summer of 1944. He was not absent from Los Alamos, except for three days annual leave, in February, 1945. He did not travel on Government business during Feb., 1945. The balance of his travel in 1945, does not reflect that he was absent from Los Alamos simultaneously with FUCHS. It, therefore, appeared unlikely that the HEINEMANS' recollections of his visit with FUCHS in February, 1945 were accurate. A similar doubt was cast upon his alleged visit to Dennisport in the summer of 1944.

DEUTSCH's Statements Concerning his Association with FUCHS,

FUCHS' Other Associates

and

Notes on FUCHS' Character

DEUTSCH was interviewed on February 15, 1950 at his home in Cambridge, Massachusetts. As soon as the subject matter of the interview was made known to him, DEUTSCH advised that he had been anticipating the interview because he was certain that the Bureau would know or determine that he was one of the two Americans most closely associated with FUCHS at Los Alamos. He declared that in preparation for the interview, he had, therefore, spent the preceding two weeks discussing with his wife all independent and mutual recollections they had of FUCHS. DEUTSCH further declared that FUCHS' arrest had been the subject of widespread discussion among the faculty members at MIT, who had ever known or met FUCHS. DEUTSCH asserted that he used these "bull sessions" to further refresh his recollections.

DEUTSCH declared that he had not been amazed at the headlines concerning FUCHS. At Los Alamos, he had found FUCHS to be a lonely, reticent individual, who, as a single man, had little opportunity to circulate in society or provide himself with social amusement. Out of kindly human sympathy, DEUTSCH declared that he and his wife had made it a point to invite FUCHS to their home whenever they entertained, particularly for dinners and similar events. In their post entertainment discussions of him at one time, they had commented one to the other that one had the

~~TOP SECRET~~

BS [66-3519] u

~~TOP SECRET~~

feeling that he knew FUCHS, until he attempted to judge what FUCHS' reaction might be to a given situation. Since there was never any answer to this question, DEUTSCH and his wife agreed that they knew not the man, but only the "shell or hull of the man." DEUTSCH asserted that his family had a long and respected career in the field of psychiatry. He and his wife had, therefore, attempted to psycho-analyze FUCHS in an amateur fashion. DEUTSCH asserted that this had resulted in the conclusion that FUCHS presented to his associates only "outward appearances," and that FUCHS had carefully concealed his true personality. This is an example of "split personality" or schizophrenic.

However, DEUTSCH had rationalized further that schizophrenic is uncommon to scientists, while common to artists. They had, therefore, attempted to find some other reason for this type of behavior and had come to the conclusion that FUCHS was a homosexual. Immediately upon reading the headlines concerning FUCHS' arrest, DEUTSCH stated that he and his wife had both realized that their previous analysis of FUCHS had gone too far; that he was in fact a true schizophrenic. The DEUTSCHS claimed to have made this discovery prior to the publication of FUCHS' confession, and, it is noted, they are self-satisfied with their efforts in amateurish psychiatry.

DEUTSCH stated that his associations with FUCHS at Los Alamos were of the social nature described above. They were not employed on the same project, and he has difficulty in remembering exactly what FUCHS did do at Los Alamos. DEUTSCH further declared that in February, 1947, FUCHS came to the United States to secure the declassification of certain atomic material by the AEC for the British Government.

Following his visit to Washington, FUCHS came to Cambridge, Massachusetts, and when DEUTSCH learned of this, he invited FUCHS to dinner. It is DEUTSCH's firm recollection, and it is noted that he reviewed the age of his baby and Mrs. DEUTSCH's condition of health in February, 1947, that he took FUCHS to a restaurant in Cambridge rather than entertain him at home; that the visit was definitely in February, 1947, and not at any earlier date.

DEUTSCH stated that he next saw FUCHS in December, 1948. DEUTSCH claims that in the Christmas vacation period of that year, he went to England on a vacation trip, and to confer with British scientists with whom he had been associated at Los Alamos. DEUTSCH traveled without his wife and was a house guest of RUDOLPH PEIERLS. During the course of his visit, PEIERLS gave a cocktail party, at which most of the British scientists from Harwell were present. FUCHS was among them. At some time during the evening, DEUTSCH states he asked if the British were having any

~~TOP SECRET~~

AS [66-3819] (b) 6

~~TOP SECRET~~

trouble with the "extreme left wingers." Someone in the group, according to DEUTSCH, responded that it had been discovered that KLAUS FUCHS had been a member of the Communist Party of Germany, prior to World War II, and that the extent of his activity and associations in that movement were then the subject of a British security inquiry. DEUTSCH stated that this was the first knowledge he ever had of FUCHS' political sympathies, and that it had surprised him. No further comments were made in this regard.

DEUTSCH also noted that in 1944-1945, at Los Alamos, there was considerable discussion among the scientists working on the atom bomb, which ran along the following vein. These scientists had discovered a new and terrible destructive weapon. The future peace of the world depended upon the effective international control of this weapon. The British, as allies in the war against Germany, had been invited to review the work done by American scientists, and to participate in further work. The Russians, also allies against Germany, had not been so invited, and were conspicuous by their absence. The Russians in the minds of these scientists were contributing much of their life blood and resources in the efforts to defeat Germany, and it did not seem fair that they should be deprived of the knowledge given the British. Effective permanent international control of the atomic bomb would be an impossibility without participation of the Russians in all such efforts. The conclusion was, therefore, reached that the Russians should know of the atomic research, and that in an effort to engender good will, it was much preferred they be told before the task was completed than afterward. A number of the scientists allegedly expressed the opinion that if the proper officials in Washington were not wise enough to see this situation, then in the interest of humanity, it was incumbent upon someone of them to advise the Russians without further consultation with Washington authorities.

DEUTSCH noted that to his best recollection, almost every scientist at Los Alamos participated in the above discussions, and they all of them agreed, at least in some part, with the program outlined above. DEUTSCH further declared that upon the formation of the United Nations, the attitude was not to give the atom bomb secret to Russia, but to give it to the UN as an effective international agency to control the use of the weapon.

DEUTSCH stated that it now quite clear to him that the only scientist he knows who did not participate in such discussion and who did not make any such comments was KLAUS FUCHS.

~~TOP SECRET~~

BS [65-3319] K

TOP SECRET

ROBERT MARSHAK

DEUTSCH stated that next to himself, the most close associate of FUCHS at Los Alamos was ROBERT MARSHAK. The association, in DEUTSCH's opinion, was social and largely predicated upon the same motives, which caused the DEUTSCHS' association with FUCHS. DEUTSCH asserted that shortly after FUCHS' arrest, Mrs. MARSHAK had written to Mrs. DEUTSCH, stating "of all the people to pick on." DEUTSCH said that MARSHAK was in almost daily contact with FUCHS because they worked in the same section at Los Alamos.

JORDON CARSON MARK

DEUTSCH asserted that JORDON CARSON MARK, whom he referred to as CARSON MARK, was a person at Los Alamos, who apparently had been well acquainted with FUCHS. DEUTSCH could provide no further information regarding the association between the two men.

RUDOLPH and EUGENIA PEIERLS

DEUTSCH stated that RUDOLPH PEIERLS headed the British Mission to Los Alamos, and that he had originally introduced him to FUCHS. PEIERLS, according to DEUTSCH, attempted to assist all of the British scientists who were at Los Alamos, and he made it a particular point to entertain FUCHS, because of his apparent loneliness. Mrs. PEIERLS was described as "Mother PEIERLS" by DEUTSCH. She had made it a habit to look after all of the younger men. The PEIERLS have boasted, according to DEUTSCH, that all worthwhile physicists in England had spent one evening in their home, and that so also have all international visitors to the PEIERLS' neighborhood.

Mrs. DEUTSCH was interviewed following the interview of her husband, and offered no additional information other than the foregoing. Both MARTIN and SUZANNE DEUTSCH had no further information concerning the associates of FUCHS either at Los Alamos or at Cambridge, Massachusetts.

THE UNIDENTIFIED CHEMIST

KLAUS FUCHS, according to information provided by the Bureau on February 9, 1950, described his contact in the United States as person who is not a nuclear physicist, but one who has knowledge of chemistry and engineering. FUCHS stated that his contact was not inside the atomic energy project. FUCHS further stated that his contact was age about 40 to 45, height possibly 5' 10", build fairly broad, and face round. FUCHS further stated that he felt that his contact was possibly the first generation American, but he could not establish his ancestry.

ROBERT HEINEMAN was of the opinion that his daughter MARCIA, then age 4, and now age 9, might possibly remember something being promised her brother, when nothing was promised her. He, therefore, interrogated MARCIA for any memory she might have had of a friend of her uncle, who had promised STEPHEN a chemistry set. MARCIA had no memory.

The book, "Mrs. Palmer's Honey," was obtained and submitted to the Laboratory for examination for latent prints, secret writing, and origins all results were negative.

Possibly Chicago

In May or June, 1949, ROBERT HEINEMAN reviewed his wife's personal effects following her commitment to the mental hospital, in an effort to clean up his home, and also possibly to discover material, which would be of evidentiary value to him in a divorce proceeding. He came across a letter addressed to KRISTEL HEINEMAN by KLAUS FUCHS. He cannot recall the time

TOP SECRET

- 18 -

~~TOP SECRET~~

AS [65-3319] X u

~~TOP SECRET~~

~~TOP SECRET~~

at which this letter was written, but he does remember that the last paragraph requested KRISTEL to extend her brother's greetings to her children and a number of people, who resided in Cambridge. These people were known to ROBERT HEINEMAN at the time, and he attached no significance to that portion of the paragraph. However, the sentence requesting the expression of regards ended with "and JOSEPH." HEINEMAN remembers being puzzled by this because he could think of no one of his personal acquaintances, whose first name is JOSEPH; the name is unfamiliar to him.

ASSOCIATION OF KLAUS FUCHS and ISRAEL HALPERIN

ISRAEL HALPERIN, a mathematician, affiliated with Queen's College in Canada, was named by IGOR BEGUZENKO as "BACON" in a Soviet espionage conspiracy directed from the Russian Embassy at Ottawa, Canada, during the 1940's. (13) u b2

KRISTEL HEINEMAN on the occasion of her interview on February 2, 1950 stated that she had not seen or heard from her brother from 1935 until approximately April, 1942. On the occasion of her first interview, February 2, 1950, Mrs. HEINEMAN stated that sometime in 1943, ISRAEL HALPERIN wrote WENDELL FURRY to advise that KLAUS FUCHS was interned as a German alien in a Canadian internment camp. Thereafter, KRISTEL HEINEMAN heard regularly concerning KLAUS FUCHS from the FURRIES, who in turn were receiving the information from HALPERIN.

When interviewed on February 6, 1950, Mrs. HEINEMAN stated that in April, 1942, her brother, KLAUS FUCHS, was interned as a German alien enemy of the British in a camp in Canada. When he had been so interned for about one year, ending April, 1942, she discussed his situation with the FURRIES, who advised that they had a brother-in-law in Canada, whom they would have contact KLAUS FUCHS. It is noted that the second interview presented a complete reversal of the first one, as to the point of origin in Mrs. HEINEMAN's contact with FUCHS through the FURRIES and HALPERIN.

KLAUS FUCHS, according to Bureau advice, as received on February 18, 1950, stated that he had received an unspecified book from ISRAEL HALPERIN, but denied having HALPERIN otherwise, or having any personal contact with him. (13) u b2

At the time of HALPERIN's apprehension, he had in his possession a notebook, in which he listed the names of persons with whom he had been in association. The book was broken down into an alphabetical index and on page 2, relating to the F's is the following notation: "KLAUS FUCHS--Assistant to M. BORN, 846 Grange Lane, University of Edinburgh, Scotland, Camp N, Camp L (the latter encircled), internment operations." Directly beneath the above entry is the following: "KRISTEL HEINEMAN, 55 Farvel Road, Watertown." (13) u b2

It is noted that KRISTEL HEINEMAN's name is out of alphabetical context. (13) u

~~TOP SECRET~~

BS [65-3319] (S) u

~~TOP SECRET~~

and does not appear under the H's. It is further noted that the address shown for KRISTEL HEINEMAN was her correct address for the approximate period of FUCHS' internment. (S) u

In view of the foregoing, the following is believed to be particularly noteworthy: Mrs. HEINEMAN has a dim recollection that in the summer of 1947, she met in Cambridge, Massachusetts, ISRAEL HALPERIN's wife, MARY HALPERIN. MARY HALPERIN is the sister of Mrs. BETTY FURRY, wife of Mrs. WENDELL FURRY. Mrs. HEINEMAN has a dim recollection that MARY HALPERIN was concerned about her husband's future employment, following his acquittal in Canada of charges of conspiracy to violate the official secrets act. Mrs. HEINEMAN believes that FUCHS was in Cambridge at about the time she met MARY HALPERIN, but she cannot recall that the two ever met, and she does not associate them as friends or acquaintances in any way.

Mrs. HEINEMAN states that she is of the opinion that KLAUS FUCHS probably knew that BOB HEINEMAN was in the Communist Party. On the other hand, she feels equally certain that BOB HEINEMAN never knew of KLAUS FUCHS' membership in the Communist Party in Germany in 1933 and 1934. Her latter recollection is predicated on the thought that there had never been any occasion to discuss FUCHS' political activity in the HEINEMAN home.

ROBERT HEINEMAN on February 10, 1950, finally admitted that he had been associated with the Communist Party at Swarthmore College in 1935 to 1938, and at Cambridge, Massachusetts, from 1938 to 1949. He noted that his party association and activity in Cambridge, Massachusetts, was of a limited nature, partially because he could never adjust his own personality to that of the party members in the branch to which he had been assigned, and partially because during the years 1944 and 1945, he had been working on a night shift at the General Electric Plant in Lynn, Massachusetts, and had little opportunity for party associations. In addition, his wife had always disapproved of his membership in the Communist Party, largely on religious grounds, and as their home life, at best, was never pleasant, inactivity in the Communist Party was still another way of lessening strained relations. HEINEMAN claims that he has been very inactive in the Communist Party in recent years, attending almost no meetings, and further that no meetings have occurred in his home since May 1, 1948, when he moved to 94 Lakeview Avenue, Cambridge, Massachusetts. HEINEMAN has identified the following residents of Cambridge, Massachusetts as members of the same branch to which he belonged, at least sometime during the forties:

~~TOP SECRET~~

BB [55-3519] (6) u

~~TOP SECRET~~

STANISZEWSKI
LEIGH CAIMAN
REMAN KLEIN
MRS. NORVAN LEVENSON
MRS. BETTY FURRY
DAVE and BARBARA BRENNETT
DANIEL BOONE SCHIRMER
MRS. ISADORE (ALICE) ALDUR
RHOLA TRUAX ALDRICH
HENRY SILBERMAN
ELIOT SILVERMAN

Mrs. HEINEMAN in turn claimed on February 2, 1950, that in addition to the foregoing, the following had been associated in Cambridge, Massachusetts in Communist Party activity with ROBERT HEINEMAN:

WENDELL FIRY
ARTHUR OGDEN
HASLIER WHITNEY
ISADORE ALDUR

She identified ~~TED VELTFORT~~ as a member of a Communist organization with her husband at Swarthmore.

Of the foregoing, it is noted that, the names of Mr. and Mrs. NORVAN LEVENSON, WENDELL and BETTY FURRY, ISADORE ALDUR, HASLIER WHITNEY, ~~TED VELTFORT~~, LEIGH CAIMAN and HENRY SILBERMAN also appeared in HALPERIN's notebook.

"Chapter 10 of the Superintendent of Documents' issue of the Smyth Report, dated August, 1945 is entitled "The Separation of the Uranium Isotopes by Gaseous Diffusion." A review of this chapter at page 126 of the Smyth Report, paragraph 10.3, reflects that "theoretical studies and process development by M. BENEDICT add much to the knowledge in this field and served as a basis of design of the large plant." BENEDICT is believed to be likely identical with MANSON BENEDICT.

Investigation at Boston has disclosed that MANSON BENEDICT was and still is a close acquaintance of ISADORE ALDUR, cited in the previous section of this report. ALDUR, in turn, was not only well acquainted with BENEDICT but further with NORMAN NEALL, a Canadian chemist, named by IGOR GUZENKO as a part of the Soviet espionage system in Canada.

MANSON BENEDICT is further a brother to WILLIAM SIDNEY BENEDICT, sometimes physicist in the Department of Commerce under Dr. EDWARD U. CONDON. Investigation at Boston discloses that WILLIAM SIDNEY BENEDICT was acquainted with both WENDELL FURRY and the latter's brother-in-law, ISRAEL FALPERIN.

UNKNOWN SCHENECTADY SCIENTIST

Mrs. HEINEMAN has stated that in the summer of 1947, KLAUS FUCHS visited her after a trip on British Government business to Washington, D. C. During this summer of 1947 visit to Cambridge, Massachusetts, it was necessary for FUCHS to make a trip to Schenectady, New York, in connection with his British Mission. FUCHS informed KRISTEL HEINEMAN, CONSTANTIN LAFAZANOS, and ROBERT HEINEMAN, all of whom remember that portion of the incident, that he had worked with the scientist at Los Alamos; that said scientist was a very important man. FUCHS invited his sister to make the trip to Schenectady with him. Mrs. HEINEMAN states that the purpose of her going was to give her an opportunity to get away from the home and children for a little rest. Mrs. HEINEMAN and FUCHS left Boston on an evening train, and arrived in Schenectady, New York on the following morning.

FUCHS then left his sister at a drug store, not far from the Schenectady Railroad terminal for several hours. FUCHS took a taxi cab from the drug store, according to KRISTEL HEINEMAN to visit the unnamed scientist. He was at that time allegedly employed on a one-year contractual basis by a commercial company. KRISTEL remained in the drug store until the late afternoon, when FUCHS returned. They then took a bus to the outskirts of Schenectady, where they called at the home of the unknown scientist.

KRISTEL HEINEMAN states that FUCHS and she had dinner at this man's home, and met several students who had come to see the unnamed scientist. She noted that the unnamed scientist was, in normal profession, a teacher. They had dinner at the home, but she cannot recall the name of the scientist nor the address.

After giving consideration to flying to Boston, Mrs. HEINEMAN and FUCHS took a return night train to Boston. They did not fly because of misty weather conditions. Mrs. HEINEMAN cannot recall the name of the company by which the unnamed scientist was employed.

All of the photographs mentioned in an earlier section of this report, with reference to UNCHEM, were exhibited to her, and she failed to identify any of them, as being the Schenectady scientist.

CONSTANTIN LAFAZANOS states that he heard the Schenectady scientist's name; that it is a short name, and of German origin; that he would remember it if it were presented to him. He has specifically and already

TOP SECRET

~~TOP SECRET~~

AS [65-3304] JHU

REPORT ON BOW STREET HEARING, FEBRUARY 10, 1950

Chief Magistrate: Sir Laurence Dunn

SECRET

Defendant: Dr. Klaus Emil Julius Fuchs

Defense Counsel: J. Thompson Halman

Chief prosecutors for the Crown: Christmas Humphreys
R. E. Seaton

Charges (under Section 11C of the Official Secrets Act of 19--):

1. That on a day in 1947, for a purpose unsafe to the state, the defendant passed to a person unknown information relating to atomic research which might be of use to an enemy.
2. That in February 1945 for a purpose prejudicial to the state, in the United States, the defendant communicated to persons unknown information relating to atomic research which might be of use to an enemy.

Opening the case for the Prosecution,

Humphreys said the Crown would base its argument on the oral statements of Fuchs to three witnesses and on a written statement signed by Fuchs.

The statement, he continued, would show that the admission was voluntary, without any threats or promises, and that it amounts to a "complete confession."

Dr. Fuchs, he said, was born near Frankfurt in 1911, schooled at Leipzig and Kiel. In 1932, he became an anti-Nazi and joined the German Communists, fleeing to Great Britain in 1933 due to fear of the Nazis. In 1940, he was interned in Britain. The prosecution described Fuchs as possessing a "brain very rare indeed" and one of the finest theoretical physicists living. In 1942, it continued, when atomic research was becoming intensified, Fuchs was removed from interment and permitted to do atomic research at Birmingham University. In July 1942 he was naturalized, signing the oath of allegiance; in 1942 he also signed the security pledge, which

65-58805-452

ENCLOSURE

449

Urgent

was renewed in 1944. He always impressed his superiors as being thoroughly security minded. In his written statement, according to the Prosecution, he said that shortly after his release from internment, he was asked by a Professor Miles ~~interview~~ (phonetical translation) to do some atomic research at Birmingham University. He didn't know what the work was, but it "would have made no difference." Fuchs decided to pass information to Russia. He established contact with agents, which had been continuous since then, knowing that the information would reach the Russians.

The testimony of Scardon, the prosecution continued, would show that there was a continuous passing of information at irregular intervals. An intermediary arranged the first interview. At first, Fuchs confined the information he passed to "his own brain" but this developed into ^{allegedly} "something more." He knew that he was transmitting this information to the Soviet Union because he was under the assumption that his first meetings in London were with Russians and, at one undesignated time, he visited the Soviet Embassy in London.

Continuing, the prosecution said that it would not be necessary to reveal how many results of atomic energy research were given away -- "you will hear evidence from experts" -- but that information was of the "highest value to the enemy."

The motive, it said, is irrelevant, adding subsequently, however, that his real motive was "unswerving devotion to Red Communism." It pointed out that he did receive money for his services. At first he received expenses only but after 1946 received the sum of £100 (explained in testimony).

It is clear, said the prosecution, that one-half of Fuchs was beyond "the reach of reason and impact of facts"; the other half was normal. He

more

Urgent

16

produced a deliberate form of dual control, or "controlled schizophrenia" (as he reportedly termed it in his written confession), in order to maintain a Jekyll-Hyde existence. This leakage of information became known to authorities, said the Prosecution, and the resultant enquiry gave rise to grave suspicion of Fuchs at Harwell. The prosecution suggested that Fuchs became aware of this suspicion. He volunteered information that his father had been offered a chair at Leipzig in the Soviet Zone and discussed the possibility of his resignation with the Security Officer at Harwell. Fuchs' lawyer gave authorities a "good opportunity" to query Fuchs and many interviews took place before his arrest on February 2, 1950. The Prosecution also suggested that a "mental crisis" prompted his confession to the Harwell Security Officer.

Further, it said, he made a statement of his own free will (the statement dictated to Scardon), corrected it himself in his own handwriting, paragraphed it himself, and added these words: "I have read the statement and to the best of my knowledge it is true."

In his written statement, according to the prosecution, he described how Professor Pilos had asked him to do war work at Birmingham University. He didn't know what it was, but it would have made no difference in his subsequent actions. He made contact through the Communist Party and had complete confidence in Soviet policy because he believed that the ~~Entente~~ West was responsible for the German-Russian war. Because of his bonds of work and friendships formed, ^{deliberately} he developed a split mind. During the war, however, he began to doubt Russian policy but still believed that the Soviet Union would build a "new world" in which he would take part. It followed, however, that he began to ask himself if he could continue his

secret activities. He decided that he could not do so. Shortly afterwards his father was offered the Leipzig chair; Fuchs allegedly wrote that he knew he could not stop him, but it made him face facts -- the certainty of incriminating letters, the situation created by his father living and working in the Soviet Zone, etc. He admitted denying charges when confronted with the first facts of suspicion, but said his resignation at that time would have been a "grave blow" to Harwell and arouse the suspicions of people "I loved." Speaking of "certain standards of moral behavior in everybody," he came to the conclusion that all he could do would be to try to repair the damage so that "Harwell suffers as little as possible," and he spoke further of his friends there. He stated that most Britons he knew in his early days here were left-wingers but, since working at Harwell, he had come to appreciate the "deep-rooted firmness" of the British as a whole.

First person to take the stand was identified as Commander Durr, of the Special Branch. He confirmed the two charges; taking Fuchs into custody, and the fact that Fuchs had asked to see Perrin. Durr presented Exhibit 1 -- identified only as the "File to the Attorney-General" and -- Exhibit 2, the accused's certificate of naturalisation, with the signed oath of allegiance on the back. It was dated July 31, 1942 and, Durr said, taken from Fuchs' private address at Harwell on February 2, 1950.

The Defense announced that it did not intend to cross-examine, but would pose one question to Scardon, when he took the stand.

Stewart

5 --- summary of hearing

FIRST WITNESS

Gerd

Wing Commander Harry Arnold (RAF retired), Security Officer at Harwell

Q. When did the accused join the Harwell establishment?

A. Soon after August 1946.

Q. Was he in charge of the theoretical physics division?

A. Yes.

Q. Did you impress the importance of security upon him?

A. Yes.

Q. What was your impression?

A. He appeared to be an exceptionally security-minded person.

Q. On October 12, 1949, did he come to see you to tell you about his father receiving the offer of a chair at Leipzig?

A. Yes.

Q. On October 20, 1949, did you see him about it?

A. Yes. He asked whether I thought he should resign. I replied that was not a matter for me, but for higher, administrative authorities.

Q. Did you introduce Scarden to Fuchs?

A. Yes.

Q. Were further meetings arranged?

A. Yes.

Q. On January 26, 1950, did Fuchs see you again before seeing Scarden?

A. Yes.

Q. Did you ask him if he had disclosed any information to foreign agents?

A. Yes.

Q. Did he admit that he had?

A. Yes.

(more)

W.M.

- Q. Did he tell you of any technical data that he had disclosed?
- A. Very broadly.
- Q. Was this technical information on the results of atomic energy research likely to be of "greatest possible value to an enemy?"
- A. Definitely.

(Court recorder's summary of answers)

SECOND WITNESS

William James Scardon, officer of the Security Service

(given permission to refer to typed notes)

- Q. Did you first see Fuchs on December 21, 1949, at Harwell?
- A. Yes.
- Q. Did Fuchs tell you about his early life?
- A. Yes.
- Q. Did your conversation touch upon the oath of allegiance which he had signed in 1942?
- A. Yes.
- Q. What did he say?
- A. He regarded it as a serious matter but he claimed freedom to act in accordance with his conscience should circumstances arise comparable to those existing in Germany from 1932-1933, when he would feel free to act on a loyalty to humanity only.
- Q. Did you indicate that he was suspected of giving information to Russia?
- A. Yes.
- Q. What was his reaction?
- A. He seemed surprised; he smiled and said "I don't think so."
- Q. Did you make it clear that you had information on this matter?
- A. Yes.
- Q. What did he say?
- A. He said, "I don't think so. I don't understand. Perhaps you would tell me what the evidence is."

more

add to A. "... I have not done any such thing."

(Prosecution interposed a remark that this was his attitude for some time.)

Q. What did he say about the possibility of his resigning?

A. That since he was under suspicion, he might upon reflection think it quite impossible to continue to work at Harwell. And if he came to that conclusion, he would resign. He thought it would be simple to get a university post. He also foresaw no particular financial disadvantage. At the same time, he made it quite clear that his great interest was in the work in which he was then engaged.

Q. On December 30, 1949, did you tell him that the Ministry (of Supply) was likely to dismiss him?

A. Yes.

Q. Giving as the reason his father's presence in Leipzig?

A. Yes.

Q. On January 24, did you see Fuchs at your own request?

A. Yes.

Q. What did he say?

A. That it's "up to me now."

(Once again, according to the witness, Fuchs recounted his life story but made no admission of the offences.)

Q. What was his mental state?

A. He seemed to be under considerable mental stress.

Q. What did you say?

A. I told him to unburden his mind and clear his conscience by telling me the full story. I told him it seemed to me that whereas his long story (provided) motives for the acts, he had told me nothing about the acts themselves.

Q. What did he say?

A. That he would never be persuaded by me to talk.

Q. What did he say after lunch (on the same day)?

A. He said he'd decided that it would be in his best interests to answer the questions. He added that he had a clear conscience but was worried about the effect of his behavior upon friendships contracted at Harwell.

Q. Did he answer questions?

A. Yes.

Scardon's summary of Fuchs' statements: He admitted that he was engaged in espionage from mid-1942 on until about a year ago. There was continuous passing of information relating to atomic energy at irregular but frequent intervals meetings. This illegal association commenced upon his own initiative. No approach was made to him. He spoke to an intermediary who arranged the first rendezvous. Thereafter, future interview were arranged at current meetings, with alternate arrangements to meet any eventuality. For a long time, he confined the information to the product of his own brain. But as time went on, it developed into something more. Contacts sometimes were certainly Russian. But others were of unknown nationality. He realized that he was carrying his life in his hands, but he had done this since underground days in Germany. He said there were prearranged rendezvous and recognition signals to be exchanged. The associations were continued during 1944 in New York and for a period at Los Alamos and in London again on his return to England. Generally, the meetings were short and consisted of his passing documentary information, and of the other party arranging for the next rendezvous. At times he was questioned, but he definitely thought these enquiries were inspired from some other quarter than the brain of the contact. For the last two years, there was a gradual reduction of the flow of information which he passed, since the time he began to doubt the propriety of his actions. He still believes in Communism, but not as practised in Russia today; this form of Communism, he thinks, is something to fight against. He was never a member of the British Communist Party. He decided fairly recently that he could only settle in England, and he had been terribly worried about the impact of his behavior upon friendships with various people and in particular with Wing Commander Arnold at Harwell.

Expenses and rewards? In his early days, he accepted expenses, and admitted taking £100 shortly after returning to England in 1946. He explained that he had discussed acceptance by Dr. Allen Munn May of money from the Communists, with a friend who knew May. The friend told him that May had accepted the money merely as a token payment. Fuchs, after much thought, accepted the £100 as 'symbolic payment signifying his subservience to the cause.'

Q. Did you see Fuchs on January 26 at his own request?

A. Yes.

Q. Did he seem anxious to resolve his position?

A. Yes.

Q. How did he come to make a statement?

A. He was worried over whether authorities would understand his position,
I asked him if he wanted to make a written statement incorporating

any details which he thought should be borne in mind. I suggested three possibilities: 1, to write a memorandum himself; 2, to dictate a statement; or 3, that I write a statement at his dictation. Fuchs said he would like to avail himself of my services, so we arranged to meet in London on January 27th for this purpose.

After the conversation, Scardon queried Fuchs on his meetings with agents. According to him, Fuchs said he had six meetings in all before going to New York. The initial meeting was at a private house in London with a man whom he thought to be Russian, in 1942. Thereafter meetings were held at intervals of about three months before he went to New York in December 1943. In New York, he had three or four meetings following the first which was arranged before he left England. There were further meetings before he went to Los Alamos in August 1944 and returned to England in 1946. (No more specific information given.)

- Q. How many persons did he contact in the United States?
A. Only one at the time.
Q. After his return to Britain?
A. Beginning in 1947, there were meetings at two-month intervals and always with the same person, in London.

Scardon then testified that he met Fuchs at Paddington Station on January 27, 1950, and took him to the War Office. He cautioned him that he was not obliged to make any statement, and there was no question of threats or promises. At the War Office, Scardon wrote down the statement. Fuchs read it over, corrected it and wrote the last line: "I have read this statement and to the best of my knowledge it is true." Scardon witnessed the statement.

The original statement in Scardon's handwriting was entered as Exhibit 3, designated as a "secret document" and submitted for safe-keeping.

- Q. What was Fuchs' attitude toward the future?
A. He was anxious to discover what the future was to be, and did not want to waste any time in getting the matter cleared up.
Q. Did he offer to give technical information to a technical expert (regarding date that he had passed)?
A. Yes.
Q. Did he meet Perrin on January 30?
A. Yes. (Scardon said he again met Fuchs at Paddington, took him to the War Office to meet Perrin, and was present at their conser-

Fuchs' security undertaking was then entered as Exhibit 4.

→→→

Here, the Defense interposed its only question. It asked Scardon: "Would it be fair to say that since luncheon on January 26, the defendant has helped you and been completely cooperative in every way?" Scardon answered yes.

THIRD WITNESS

Michael Wilcox Perrin, deputy comptroller of atomic energy technical policy, in the Ministry of Supply.

- Q. On January 30, did you meet Scardon and the accused?
- A. Yes.
- Q. Did he admit that he had passed technology information relating to atomic energy research to the Communists?
- A. Yes.
- Q. Did he give you what he said were full details in chronological order?
- A. Yes.
- Q. Did he give you this information under four main headings?
- A. Yes.

The first heading was "information passed between 1942 and December 1943 in Great Britain."

The second was "information passed between December 1943 and August 1944 while in New York." (It was pointed out that he was at that time a member of the British Atomic Energy Diffusion Commission.) The third heading was "August 1944 to the summer of 1946 while employed on the British atomic energy team at Los Alamos.

- Q. When was his first contact from Los Alamos with a Russian agent?
- A. February 1945 in Boston.
- Q. Did he admit that he passed information?
- A. Yes.

Q. Did he tell you what it was?

A. Yes.

Q. In your opinion, was it of value to an enemy?

A. Yes.

Fourth heading was "information passed from the summer of 1946 to February 1949 while at Harwell."

Q. Did he have dealings with agents in 1947?

A. Yes.

Q. Did he pass information relating to the results of atomic energy research?

A. Yes.

Q. Was it of value to the enemy?

A. Yes.

Q. Was all the information passed of a technical character related to atomic research, and of value to a potential enemy?

A. Yes.

Perrin then looked at Exhibit 4, and stated that it was the usual security undertaking issued to all persons involved in the wartime project.)

Fuchs stood up in the dock, and the Chief Magistrate then read the two charges. The Defence arose, stating that it had nothing to say and would offer no evidence. The Chief Magistrate then committed the case to trial in criminal court proceedings beginning on February 26.

There is attached an advance copy of the transcript of the hearing before the Bow Street Magistrate's Court on February 10, 1950, regarding the above-captioned case and which has just been made available to writer by Mr. Longshaw, Official Reporter for the Bow Street Magistrate's Court.

DEFERRED RECORDING

Arrangements have been made to also obtain a transcript of the hearing as reported by the New Scotland Yard Recorders who attended the hearing of this case. This will not be ready until Monday, February 13, 1950, at which time it will likewise be forwarded to the Bureau.

Very truly yours,

Lish Whitson

~~SECRET~~

BOW STREET COURT, LONDON WC 2

FRIDAY FEBRUARY 10 1950

Dr KLAUS EMIL JULIUS FUCHS, aged 38, head of the theoretical physics division at Britain's atomic energy research station at HARWELL, Berkshire, was at BOW Street MAGISTRATE'S COURT committed for trial at the CENTRAL CRIMINAL COURT session starting February 28 on charges under the OFFICIAL SECRETS ACT, 1911.

The charges are:

(1) That, on a day in 1947, for a purpose prejudicial to the safety or interests of the State, he communicated to a person unknown information relating to atomic research which was calculated to be or might be directly or indirectly useful to an enemy.

(2) That, as a British subject, he committed a similar offence in the United States on a day in February, 1945.

The case was heard before the Chief Magistrate, Sir Laurence Dunne.

COUNSEL: For Prosecution - Mr. Christmas Humphreys, Mr. R.E. Seaton, and
Mr. H.A.K. Morgan.

For Defence - Mr J.Thompson Halsall.

MR. HUMPHREYS: There are two charges, both brought under Section 1 (1) (c) of the Official Secrets Act, 1911. The first offence took place in England. On the actual offences I shall call three witnesses and then ask for a committal to the Central Criminal Court. To all three witnesses whom I shall call the accused made statements orally, which amount to a confession of these two charges. To Mr. SKARDON, an officer of the Security Service, he made a statement in writing voluntarily and without any threat or protest. I shall produce it in evidence. I claim it amounts to a complete confession of the charges. So far as it is capable of verification as to the facts, it is believed to be true. The evidence of these three witnesses and the written statement constitute the case for the prosecution.

The story briefly is : He was born near Frankfurt, in Germany, in 1911, educated at the Universities of Leipzig and Kiel, and in 1932, so he says, he became an anti-Nazi and joined the German Communist Party. In 1933 he left Germany for France and thence to England as a refugee, so he says, from Nazi oppression.

In 1940, on the invasion of France, he was interned in England. In 1942 atomic research was being intensified in more than one country, certainly in England. The finest brains available were needed to assist in the research, and such brains as Dr Fuchs possesses are very rare indeed.

He was known and proved himself to be one of the finest theoretical physicists living. Undoubtedly, he had done magnificent work for British atomic research. After a very careful scrutiny of his background and apparent mental make-up he was taken from internment and his great brain was harnessed to atomic research.

He was taken to work with Professor Peierls at Birmingham University. In July 1942 he was naturalised and became a British subject. At that time he signed an oath of allegiance and I shall produce the oath of allegiance which he signed at the time. In it he says "I swear by Almighty God that I will be faithful and bear true allegiance to His Majesty King George VI, his heirs and successors, according to law."

When he first entered atomic research before he was naturalised he signed the # usual security undertaking, and that was done again in 1944. In that document it is made clear how security-minded he must be, and, understanding it, he signed it. It is only right to say, in fairness to more than one person in Court, that he always impressed his superiors as being security-minded, but it is now clear that such an oath meant nothing to a man whose mind was irrevocably wedded to Communist principles.

In a statement which he made Dr Fuchs said that after his release from internment he was asked to help Professor Peierls in war work. He accepted, knowing nothing at first about what the work was.

"When I learned about the purpose of the work I decided to inform Russia and establish contact through another member of the Communist Party", he stated. "Since that time I have had continuous contact with persons unknown to me, and whatever information I gave was communicated to the Russian authorities."

From then on, as he later confesses in terms to Mr Skardon, there was a continuous passing of information relating to atomic energy, at irregular but frequent intervals. This illegal association, he said,

~~SECRET~~

DR KLAUS FUCHS -5-

began on his own initiative. No approach had been made to him. He arranged the first rendezvous and thereafter future meetings were arranged by others. For a long time he confined the information to the product of his own brain, but as time went on this developed.

He realised he was carrying his life in his hands, but he had done this since his underground days in Germany.

Lest there be any doubt that the communications Fuchs made were to the U.S.S.R., he said, just before his written statement, that the first meetings were in London and at one stage he visited the Soviet Embassy in Kensington Palace Gardens.

After Dr Fuchs's work in England he worked from 1944 to the summer of 1946 in the American atomic research department at Los Alamos, New Mexico. Since his return in 1946 he has been employed as the head of the theoretical physics division of the atomic energy establishment at Harwell.

How much of the results of his own research and how much of the information acquired from colleagues he has given away to the Russian authorities is it is undesirable and unnecessary to reveal, but what he did reveal was of the highest value to a potential enemy. The motive for this planned and deliberate treachery to the country of his adoption, as distinct from its purpose, which must be proved in law, is irrelevant. He did receive money. He has admitted accepting expenses in the early days of his relationship and taking £100 shortly after his return to England in 1946. He said he discussed its acceptance with Dr Alan Nunn May and added that he regarded the £100 as a token payment, signifying his subservience to the cause. His real motive, as shown by his statement, was his unswerving devotion to the cause of Russian Communism.

The mind of Fuchs may possibly be unique and create a new precedent in the world of psychology. It is clear from his statement that we have half of his mind beyond the reach of reason and the impact of facts. The other half lived in a world of normal relationships, friendship with his colleagues, and human loyalty.

~~SECRET~~

~~SECRET~~

The dual personality has been consciously and deliberately produced. He broke his mind in two, describing it as controlled schizophrenia. He had produced in himself a classical example of the immortal duality in English literature, Jekyll and Hyde.

As Jekyll he was a normal citizen would be in the use of a magnificent brain in the cause of science. As Hyde he was betraying his oath of allegiance, his vow of security, and the friendship of his friends. Outwardly he seemed to be a loyal Englishman by adoption but inwardly, unknown to all about him, he was a political fanatic on the payroll of a foreign power.

In course of time this steady leakage of information became known to the authorities in this country and the U.S.A. Intensive inquiries were made in difficult circumstances and gradually they narrowed down to grave suspicion of Fuchs at Harwell.

Whether he suspected inquiries were being made about him I dont know, but he volunteered news of his father. He volunteered that to Wing Commdr Arnold, security officer at Harwell at the time. It was in October of last year that he went to Wing Commdr Arnold and said his father, then domiciled in Frankfurt, had been offered a chair at Leipzig University, in the Russian zone. He thought he ought to tell the security officer this fact and ask whether it made any difference to his position at Harwell. He discussed with him the possibility, and indeed the likelihood, of his resignation.

It was immediately realised that here was an admirable opportunity of questioning him about his background and mentality and his continued loyalty. Mr Skardon, of the Security Service, came to question him and there were many interviews between then and February this year.

Finally, after a long period of great detail being given of his mental background, and point-blank denials of treachery, he suddenly decided, in his own words, to answer any questions. He answered many of them verbally, and finally, on January 26, he had clearly reached a mental crisis.

~~SECRET~~

SECRET
He confessed to Mr Arnold he had communicated a great deal of information which would be of value to a potential enemy. Mr Arnold will say it was technical information about atomic research which would be of value to a potential enemy.

Finally, of his own volition, he made a statement which I shall produce. He corrected it himself; he paragraphed it himself and finally signed it. He wrote in his own writing what is the final phrase to the effect that "I have read this statement and to the best of my knowledge it is true".

Mr Halsall, who defends, has been given a copy of this statement, and perhaps, if Mr Halsall agrees, I will give you a copy.

Mr Halsall: Yes.

Mr Humphreys: The first part of the statement is a long detailed description of his early life in Germany. I will begin at the middle of page 6.

He says he had complete confidence in Russian policy and had no hesitation in giving all the information he had. He believed deliberately that the Western Allies allowed Germany and Russia to fight each other to the death. He tried to concentrate on giving information on the results of his own work.

In his work he began to form bonds of friendship but he had to conceal his personal thoughts.

"I used Marxian philosophy to conceal my thoughts, which had to be separated into two compartments. One side was the man I wanted to be. I could be free and happy and easy with other people without any fear of disclosing myself, because I knew the other compartment would step in if I reached a danger point."

"It appeared to me that I had become a free man because I had succeeded in the other compartment in establishing myself completely independent of the surrounding forces of society. Looking back, the best way to call it is controlled schizophrenia. In the post-war period I had doubted Russian policy. Eventually I came to the point where I knew I disapproved of many actions of Russian policy. I still believed that Russia would build a new world and that I would take part in it.

"During this time I was not sure I could give all the information I had. However, it became more evident that the time when Russia would

Dr FUCHS -6-

spread her influence over Europe was far away. I had to decide for myself whether I could go on for many years continually handing over information without being sure I was doing right. I decided I could not do so. I did not go to one rendezvous because I was ill and I decided not to go to the following one".

Shortly after this his father said he might be going to the Eastern Zone of Germany. He knew his father disapproved of many things in Eastern Europe, but could not bring himself to stop his father going there.

"This made me face some of the facts about myself. I did not have the courage to fight it out for ~~myself~~ myself and took it out of my hands by informing the authorities my father was going to the Eastern Zone. A few months passed and I became more and more convinced I had to leave Harwell.

"I was then confronted with the fact that there was evidence I had given away information in New York. I was given a chance of admitting it or clearing out. I first denied the allegations and decided to leave Harwell. Then it became clear that in leaving Harwell I should deal a grave blow to Harwell and to the work I loved and also I should leave suspicion against friends I loved and who thought I was their friend. I realised there were certain standards of moral behaviour you cannot disregard. All I can do now is to try and repair the damage I have done. The first thing is to make sure that Harwell will suffer as little as possible."

Mr Humphreys: I don't propose to read the whole of the statement. It goes on - "Before I joined the project most of the English people with whom I made contact were Left Wing and affected by a similar philosophy. Since going to Harwell I have met English people of all kinds and have come to see in many of them a deep-rooted firmness which enabled them to live a decent life".

Thereafter he expressed a desire to give a technical officer who understands his technical knowledge details of the information he had given to a foreign power.

He was introduced to Mr Peierls, deputy controller of atomic energy at the Ministry of Supply, who will say the information he gave would amount, and did amount, to information of the greatest possible value

~~SECRET~~

Mr William Skardon, an officer of the Security Service, said, "I have had many interviews with the defendant, and have reduced the relevant part of the conversations to writing. I first saw him on December 21st at Harwell. I was introduced to him by Mr Arnold. In the course of a long interview he told me in great detail of his early life. The conversation touched on his oath of allegiance. He said he regarded his oath of allegiance, taken on naturalization in 1942, as a serious matter, but he claimed freedom to act in accordance with his conscience should circumstances arise in this country comparable with those which existed in Germany in 1932 and 1933, when he would feel free to act on a loyalty which he owed to humanity generally.

Fuchs at first said he would never be persuaded by me to talk, at a later stage I made it clear that I suspected him of passing information to the Soviet. He seemed surprised, smiled, and said "I don't think so." I made it clear that I was in possession of precise information on this matter and he again replied, "I don't think so." I told him that was an ambiguous reply, and he said, "I don't understand. Perhaps you will tell me what the evidence is. I have not done any such thing."

That remained his attitude for some time. He said that since he was under suspicion he might, upon reflection, think it quite impossible to continue work at Harwell and if he came to that conclusion he would offer his resignation. He thought it would be perfectly simple for him to obtain a University post. He considered there would be no financial disadvantage, but at the same time he made it clear that his great interest was the work on which he was then engaged.

At a further interview on December 30th I told him the Ministry would undoubtedly decide to dispense with his services, giving the ground of his father's presence in Leipzig;

On January 24th, I saw him at his own request at his private address. He told me the story of his life, but without

~~SECRET~~

any admission of these offences. He was under considerable mental stress.

I suggested he should unburden his mind and clear him conscience by telling the full story and said it seemed to me that while he had told me a long story providing a motive for alleged acts he had told me nothing about the acts.

The Magistrate; Had he been cautioned.

Mr Humphreys; No.

Mr Skardon; He replied, "I will never be persuaded by you to talk". After lunch he said he had decided it would be in his best interest to answer my questions. He added that he had a clear conscience but was worried about the effect of his behaviour upon the friendships which he had contacted at Harwell

He said he was engaged in espionage from mid 1942 until about a year ago. There was a continuous passing of information relating to atomic energy at irregular and unfrequent meetings. This illegal association began on his own initiative, no approach having been made to him. He himself spoke to an intermediary who arranged the first rendezvous. Thereafter future interviews were arranged at the current meeting with an alternative arrangement to meet ~~every~~ eventually.

For a long time he confined the information to the product of his own brain, but as time went on this developed into something more. He said contacts were sometimes certainly Russian, but others were of unknown nationality. He realised he was carrying his life in his hand but he had done this from the time of his underground days in Germany. There was a pre-arranged rendezvous, and recognition signals were exchanged. The association continued during 1944, in New York, for a period at Los Alamos, and in London after his return to

10

England. Generally the meetings were of short duration and consisted of his passing documentary information. For the last two years of his association with the Russians there was a gradual reduction in the flow of information which he imparted.

Dr Fuchs said he still believed in Communism, but not this as practised in Russia to day. He thought this form was something to fight against. He had never been a member of the British Communist Party. He had decided fairly recently that he could settle only in England, and he had been terribly worried about the impact of his behaviour upon friendships with various people, and in particular with Wing Commander Arnold at Harwell.

Mr Humphreys; What did he say about expenses and reward?

Mr Skardon; He said that in the early days he accepted expenses and admitted taking £100 from contacts shortly after return to England in 1946. He explained he had discussed the acceptance by Dr Alan Nunn May of money from the Russians. A friend who knew May said he thought he had taken the money merely as a token payment. The accused, after thinking it over, accepted the £100 as a symbolic payment, signifying his subservience to the cause.

On January 26th I again ^{Show} Dr Fuchs at his own request.

Mr Humphreys; Was he anxious that his position should be resolved as quickly as possible? — He was. He wondered if the authorities would clearly understand his position. I asked him if he would like to make a written statement incorporating any details which he thought ought to be borne in mind. He said he would and later, in London on January 27th, I asked him about his meetings with contacts. He said the first was in 1942 at a private house in London, where he met a man who he believed to be a Russian. There were further meetings about every two months.

11

six in all, before he went to New York in December 1943. There were three or four meetings in New York and there were further meetings between the time he went to Los Alamos in August 1944, and his return to England in 1946. Dr Fuchs said there was only one person at each contact. On his return to England meetings took place roughly at two-monthly intervals, always with the same man in London. On January 27th, I took Dr Fuchs to the War Office and cautioned him. He said, "I understand, carry on". I wrote a statement at his dictation. He read it over, corrected it and then wrote that to the best of his knowledge the statement was true.

Mr Humphreys asked that the statement should be regarded as secret. It was then handed to Commander Burt for safe custody.

Mr Skardon: After the statement, Dr Fuchs said he was anxious to discover what the future was to be and did not want to waste any time in getting the matter cleared up. He offered to give all technical information to an expert, and arrangements were made for him to meet Mr Perrin on January 30th, when they were introduced at the War Office.

Mr Thompson Hallam. Since lunch time on January 24th has Dr Fuchs been co-operative and helpful in every way? - Yes.

Commander Leonard Burt, of the Special Branch, New Scotland Yard; I produce the fiat of the Attorney General consenting to this prosecution; also the certificate of naturalization which I found at Fuchs' address at Harwell. He is described in that as a Mathematical Physicist. On the back is the oath of allegiance.

Wing Commander Henry Arnold, R.A.F. (Retired): I am Security Officer at the Ministry of Supply atomic energy research establishment at Harwell. The accused joined that

12

establishment in August 1946. He had charge of the theoretical physics division of the establishment. From time to time I impressed on him the importance of being security minded in relation to all information at the establishment. He appeared to me to be exceptionally security minded person. On October 12th 1949, he came to see me and said his father, domiciled in Frankfurt, had been offered a chair at Leipzig University. He said he thought I ought to know it. On October 20th, I saw him again about it.

Mr Humphreys; Did he say something about his possible resignation? - He asked if I thought he would have to resign. I said it was not for me to decide, and it would have to go to the administration department. I introduced Mr Skardon to Fuchs and from time to time arranged further meetings.

On the morning of January 26th, 1950, Dr Fuchs saw me again before an appointment with Mr Skardon.

Mr Humphreys; Did you at that interview ask him if he had in terms disclosed technical information to the Russians? - Yes. He admitted that he had.

Did he then tell you some of the information he had disclosed, very broadly; - Yes.

Did you say, as the security officer at that establishment, that that was technical information about the results of atomic research which might be of the greatest value to a potential enemy; - Definitely.

The Magistrate; This gentleman is not an expert?

Mr Humphreys; No.

The Magistrate; You will be calling Mr Perrin about that?

Mr Humphreys; Yes. As a security officer he knows what

(B)
is secret and what is not.

The Magistrate; This information was highly secret?

Mr Humphreys; Yes.

Mr Michael Wilcox Perrin, deputy controller of atomic energy (Technical policy) Ministry of Supply; At a meeting at the War Office on January 30th Fuchs gave me particulars of technical information which he said he had passed to the Russians. The information was under four headings;

(1) As to information which passed between 1942 and 1943, while working in Great Britain;

(2) December 1943, and August 1944, while he was in New York.

(3) From August 1944 to the Summer of 1946, while employed as a member of the British Atomic Energy team at Los Alamos, Mexico. He told me, in regard to that, that he made his first contact with a Russian agent in February 1945, at Boston, Mass. He said he passed information at that meeting and told me that the information was that he passed.

(4) From the Summer of 1946, to February 1949, while employed at the Atomic Research Establishment at Harwell.

He told me he disclosed information about atomic energy in 1947.

Mr Humphreys; Dealing with all four periods, what he told you with regard to technical information about the results of atomic research, would that be of value to a potential enemy? -Yes.

Do you produce a security document of undertaking of secrecy, which is issued to all people engaged in war time projects? - Yes.

114

~~SECRET~~

Mr Humphreys; It is an undertaking of secrecy. There was another document at the beginning of 1944, when Fuchs became a temporary scientific officer.

On that evidence I ask for a committal to the next sessions of the Central Criminal Court, beginning on February 28th.

Mr Halaall; The defendant has nothing to say at this stage, and will call no evidence at this Court.

Dear Sir:

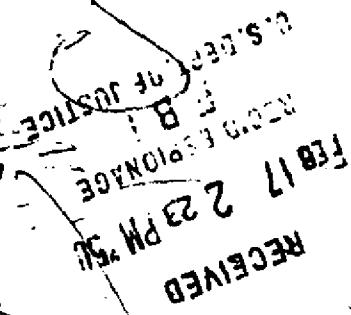

This will probably seem silly to you. occasionally I eat breakfast in Scholls cafeteria on Connecticut Avenue at L Street. On two recent Saturday mornings between 9:00 and 9:15 I have seen a man in there who looks like Fuhrer but a little more German. The thing that made me write this letter is the fact that the very first time I happened to look at him I had a terrific feeling that he was a foreign agent. I almost felt afraid even there with all these people. yesterday when I saw him there I had a peculiar feeling that he felt (but covered it up) that people were watching him. I wouldn't get over the fact either that he also favored a ^{RECORDED - 82} 65-58805-454 ^{FX-3} ~~WW II~~ colonel in Air Communications at the people trusted. I just couldn't get over the feeling - the awful feeling of the man in

Schools and I just had to write a letter. Whether he will do the other Saturday mornings I do not know.

I don't like to seem so silly but it was such a strong intuition I just couldn't help it.

I thank you for reading my letter (that is if you do).

Office Memorandum • UNITED STATES GOVERNMENT

TO : Director, FBI

FROM : SAC, Boston

SUBJECT: FOOCASE
ESPIONAGE (R)~~TOP SECRET~~

DATE: 3-1-50

[REDACTED] b1

Classified by 304
Declassify on 10 APRAut-DSC
12/22/86

Rebutel 2:02 PM this date, requesting map of Boston showing downtown commercial area.

The Bureau is being furnished as enclosures herewith two copies of Cram's Street Map of Boston which shows a detailed layout of the Boston business and hotel district, including the area named in the referenced teletype.

A copy of this map is also being furnished New York as an enclosure with a copy of this letter.

Boston has retained a fourth copy so that in any future communications the Bureau may refer to this particular map without further reference.

It is noted that the enclosed maps were the best obtainable commercially and quickly in Boston. This one was selected from a number of others. Arrangements are being perfected to obtain copies of the City of Boston Assessors' Map for the same area and as soon as these are obtained they will be forwarded.

It is further noted that this downtown area of Boston is referred to in insurance circles as "the high value district." A number of insurance companies operating in Boston are British companies with home offices in London, England. Insurers used the most detailed map available; i.e., the Sanborn Map. This map is contained in a large bound volume, approximately three feet by three feet. Each page is the same size and covers an area of approximately three square blocks.

Done per cable 124
3/2/50 It is suggested that if a map of such detail is needed that LISH WHITSON obtain same through British liaison with an insurance company.

It is further noted that the area referred to by FUCHS is the same area in which the Brink's robbery occurred; that the insuring company in that instance is the Union Commercial Insurance Company of London, England; that such company likely possesses a Sanborn Map.

The enclosed map notes historical spots of interest such as the State House, the Old South Church, etc. Photographs of these historical points can be obtained on postal cards and forwarded AMSD, if desired.

See *Metropolitan Boston*

BOSTON proper is ninth in population among the cities of the United States with more than three-quarters of a million inhabitants; but as the "Hub" of the close-lying Metropolitan District it includes over two million inhabitants organized under separate town and city governments having a bond of common interest in the maintenance of park, water and sewerage systems.

Historically, Boston is rich in interest. Called "Shawmut" by the Indians it was established under Governor Winthrop as a town in 1630 and named Boston after Boston in Lincolnshire, England. It was the first town in Massachusetts to become a city, receiving its charter as such in 1822. Originally a neck of land comprising some 800 acres joined to the mainland by a narrow causeway, the marsh areas surrounding it were gradually reclaimed until now it has within its limits over 30,000 acres, the greater part of which is made land.

The visitor must not expect to find here a city laid out with streets in regular geometric design. The principal downtown thoroughfares follow the lines of travel as the convenience of the early settlers located them and in their irregularity and unexpectedness will be found an interest and unique charm which only age can impart.

In addition to the appeal which Boston has for those who seek it for its literary and historical interest, its commercial and industrial activities entitle it to a place in the first rank of the American cities. Its per capita property value is the highest, it stands first as a shoe and leather center, first as a wool market, first of the Eastern cities in the amount of fresh fish marketed, second as a textile center and fourth in total assessed valuations and in bank clearings. As the next to the largest seaport in the Western Hemisphere it offers its beautiful harbor for the shipping of the world—six miles of docks accommodating a minimum draught of 30 feet and the largest dry docking facilities on the Atlantic side.

The development of the port of Boston is being made the subject of careful, methodical study so that its present facilities are only a small part of what will eventually be added to the natural advantage it has of being the most convenient passenger port for sailings to Europe, nearer than New York by 300 miles, equivalent to 12 hours in the time of passage.

To the resident or visitor, Boston offers an inexhaustible variety, whatever his inclination may be. If it be historical, here he may find the scenes of the events which shaped the early development of our country; if literary and educational, its churches, libraries, schools and colleges; if artistic, in its galleries, museums and concert halls where the world's best of art and music may be seen and heard. Its shops, large and small, are not to be surpassed. Its hotels afford a comfort which travelers seek from afar, while for amusements there are its theatres, skating rinks, baseball parks, boating and canoeing, trolley rides, automobile rides, and nearby all the delights of the seashore, salt water bathing and excursion trips. And that man-made pleasures may not seem all, Boston has that which draws the lover of nature, hills and rivers and the ocean in ever changing variety, unspoiled but accessible through miles of parkways. For recreation, study or business, Boston leads all in the diversity and breadth of the program it gives.

ALPHABETICAL AND CLASSIFIED LIST

Of Historical Places, Memorials, Museums, Parks, Beaches, Recreation and Athletic Grounds, Public Buildings and Steam Railroad Stations frequently inquired for, giving location and brief directions for reaching them.

In these directions:

"SUBWAY" refers to surface cars operated north and south in Tremont or Boylston Street Subway.

"ELEVATED" refers to Everett-Forest Hills elevated trains operated north and south through Washington Street Tunnel.

"CAMBRIDGE SUBWAY" refers to trains operated east and west between Park Street Station and Harvard Station.

"DORCHESTER TUNNEL" refers to trains operated east and west between Park Street Station and Ashmont, Dorchester.

"EAST BOSTON TUNNEL" refers to trains operated east and west in East Boston Tunnel between Bowdoin and Maverick Stations.

"ATLANTIC AVENUE ELEVATED" refers to trains operated north and south along the waterfront, connecting the several wharves and steam railroad terminals at North and South Stations.

At points in the heart of the city where above subways, tunnels and structures intersect one another the stations are so constructed as to allow free passage between connecting lines, except at South Station where transfers may be procured from station attendant.

See map of Rapid Transit Lines for location of station.

In the absence of SAC Soucy and ASAC West, I spoke to Special Agent Robert Thomas, of the Boston Division, on February 28, to ascertain whether a photograph of Josef Mayer had been forwarded to the Boston Division and displayed to the Heinemans. This information was requested by Mr. Whitson by cable.

Ray Robison

~~SECRET~~

Special Agent Thomas advised that a teletype had been sent to the Bureau on the night of February 27, listing Mayer as one of the individuals whose photographs had been displayed to the Heinemans without identification.

AMSD

DATE: March 1, 1950

FROM: SAC, Albany

SUBJECT: *No*
FOOCASE
ESPIONAGE - R

A review of the file in the Albany Office reflects that the New York Office, which has been designated as office of origin in this case, does not have a copy of the investigative report of SA PETER F. MAXSON dated 2-17-50 at Albany covering the interview of Dr. HANS BETHE of Cornell University, under whom the subject worked at Los Alamos. Accordingly, two copies of this report are being provided with a copy of this letter to New York and additional copies of this report provided to interested offices with copies of this letter.

Mr. Lish Whitson called at 12:23 pm, March 1, to advise that the following were the contents of the four counts in the indictment against Fuchs:

"Count 1 - On a day in 1943 in the City of Birmingham for a purpose prejudicial to the safety or interest of the State communicated to a person unknown information relating to atomic research which was calculated to be or might have been, or was intended to be directly or indirectly useful to an enemy.

"Count 2 - On a day unknown between 31st December, 1943 and 1st August, 1944, being a British subject in the City of New York in the United States of America, committed a similar offense.

"Count 3 - On a day unknown in February, 1945, being a British subject at Boston, Massachusetts, in the United States of America, committed a similar offense.

"Count 4 - On a day in 1947 in Berkshire committed a similar offense."

~~SECRET~~

I advised Mr. Whitson that he should give priority to that information [which is also being transmitted by the British to other agencies] in order that the Bureau will be in possession of it immediately.

I inquired of Mr. Whitson whether he had made arrangements to interview Fuchs. He replied that as he had informed the Bureau, it was not possible for him to interview Fuchs unless Fuchs expressed the desire for the interview. He is following up on this.
